ELECTRICITY
is a war material, too—

use it carefully!

If you have ever seen a big Detroit Edison power plant, you have probably noticed the large piles of coal heaped outside. Thousands of tons of fuel are required every day to produce the electricity sent out over a network of transmission lines to factories and stores and offices and homes. That is one reason why electricity is a war material. When you save electricity you save coal, and transportation, and manpower needed for war production.

There is no shortage of generating machinery in this area, and electricity is not rationed. But—use it carefully as you would any other vital war material. Prudent, economical use of electricity is a patriotic obligation today. Help conserve electricity by reducing your use. The Detroit Edison Company.

ELECTRICITY IS NOT RATIONED.
BUT ITS PRODUCTION REQUIRES COAL
AND RAILROAD TRANSPORTATION.
DON'T WASTE IT!

Wrong Idea
"Woodman spare that tree" is most misleading, since trees reach maturity and if they are not harvested for useful purposes, grow old and decay and die.

China Rural
There are approximately 60,000,000 farm households in China out of a total of 60,000,000. That is to say, the farming population constitutes about 75 per cent of the total.

Beans Shouldn't Be Manured
Beans should not follow a green manure crop or be planted on land that has been heavily manured.
