How to

STOP FUSE TROUBLE

before it happens!

It's no fun sitting in the dark simply because a blown fuse has plunged your house into a blackout. Most fuse trouble can be stopped before it happens by observing a few simple precautions.

(1) Frayed lamp cords and extension cords are often responsible for short circuits. Such frayed cords are dangerous. Have them repaired BEFORE they cause trouble. (Don't loop cords over a nail. Don't kink cords or tie them in knots. Don't run cord through a door jamb or under rugs.) (2) Never put an electric appliance in water. Never poke at the element of your electric toaster (or any other appliance) with a fork or sharp tool, whether turned on or off. (3) Don't connect too many appliances and extra lamps on one circuit. (4) Be careful not to overload your washer, or feed too many pieces of clothing through the wringer at one time. The same is true of your ironer. (5) Disconnect appliances by pulling on the plug-never jerk out the cord. Do not let cords come in contact with water, grease or acids. (6) If a faulty lamp or appliance burns out a fuse, disconnect it at once—and don't use again until it has been repaired. The Detroit Edison Company.

Electricity is not rationed. But its production requires coal and railroad transportation. Don't waste it!

LEGAL NOTICES INTERPRISE THE CONTROL OF THE TURNAND, Alterent of the Control of Answers to your Questions about the Beer Shortage

O. Is there REALLY a beer shortage?

There certainly is, we at Altes are unable to meet the demand.

O. Is the demand for Altes any larger than usual? A. It far exceeds anything we have ever known.

Then why don't you increase your production?

We are unable to do so because of a shortage of malt. Since March 1st by necessary government restrictions our malt has been limited to 93 per cent of the amount we used in 1942. In July this amount was further cut by a new order requiring all brewers to use 15 per cent of their available malt in the production of beer for our fighting men.

> O. Couldn't your formula be changed to use less malt? A Yes, but the result wouldn't be Altes Lager.

Would Altes users notice the difference?

Any beer drinker who has come to know and enjoy the Aged-in, Sealed-in flavor of the beer we make from prime ingredients is sure to notice any change. That's because our process preserves the natural goodness.

Will I be able to get more Altes in the weeks ahead?

We hope and believe that the malt shortage will be temporary. If so, we shall immediately make more Altes—and you will get it.

THE ONLY BEER WITH THE AGED-IN, SEALED-IN FLAVOR!
