

Here's The Way...

Lead crystal decanters or cruets that have become coated with film on the inner surfaces may be cleaned by using full strength household bleach. Add a handful of coarse sand and shake vigorously. The sand will act as an abrasive.

Pewter has a lovely dull natural finish but may be polished with pewter polish or silver polish.

Driftwood can be finished by applying a paste wax or a solution of melted beeswax and turpentine.

Desired Look

ALTHOUGH Peg Troutman of Plymouth started her collection of pewter years ago, this arrangement over her fireplace has the desired look for '72. Shelves and pewter are in great demand, as are reproductions of the old schoolhouse clock at the left.
