100 POUNDS OF COAL
you didn't know you used last month!

Thousands of tons of coal are burned in our large steam generating plants every day. Here nearly all the electricity for this area is produced.

And when you turn on an electric switch in your home, you are actually burning coal... coal that has been transported by boat and by rail, coal that represents vital production and manpower. Coal and transportation are war materials. Electricity, too, is a war material. It should not be wasted.

There is no shortage of generating machinery in this area. Detroit Edison power plants have ample reserve generating capacity for the peak requirements of all war industry using our service. Insofar as one can be sure of anything in time of war, it will not be necessary to curtail our residential, commercial and industrial customers.

But careful reasonable use of electricity is patriotic—an important contribution to the war effort, The Detroit Edison Company.

MY JIMMY NEEDS YOUR HELP!

Jimmy's over there now, fighting our enemies to keep the Stars and Stripes flying. Before he left, he told me they are going to need more equipment, more ammunition and more food for INVASION of enemy lands. "The more bonds the folks at home buy—the more they'll be helping us fighters to win." That's what Jimmy said.

regular bond purchases—many will have to invest thousands! Don't think that what you do isn't important. It will take all every individual in America can raise to put this 3rd War Loan over the top. So buy more bonds out of your pay—out of extra income—out of "rainy-day" funds!

The quicker you do that the more you'll help Jimmy and our other boys smash through to victory. What do you say? It's the safest, soundest investment you'll ever make! Let's go!
