Save and Serve

—help boost the armed might
of America!

"Conservation of fuel, manpower, equipment and materials is a must for the United States if we are to achieve the maximum war production every American wants."

"Every pound of coal, every gallon of oil, every cubic foot of gas that can be saved means our national energy pool is strengthened just that much. Every manhour saved in the production of these basic fuels in the production of electricity, in transportation and in communications is a manhour that can be used for something else. Every pound of tungsten that is saved in the production of electric lamps is a pound that can be used in the production of radar equipment."

"We have, therefore, called upon the coal, petroleum, electric, natural and manufactured gas, water, communications and transportation industries to join with us in a broad conservation campaign to accomplish these results. The campaign will be voluntary. Cooperation of these industries in asking the public to use their services only as absolutely necessary represents a real sacrifice by them. We ask the American public to appreciate that sacrifice and to give them the very effort and enthusiastic and untiring cooperation as this campaign develops."
