Feed Roughage
High quality roughage of all kinds can and should be fed in liberal amounts to all dairy animals over six months of age. Heavy feedings of early cut roughage will save both energy feeds and protein-rich concentrates. Animals producing below 15 to 20 pounds of milk daily need little or no grain in addition to all of the roughage they will eat.

Drinking Water
The trained soldier never drinks water from a spring, stream, well, or faucet until it has been passed as pure by a medical officer, and so posted by a "safe drinking" sign.

Search for Oil

Britain's only previous intensive search for free-flowing oil lasted from 1918 until 1921. Limited licenses to search and drill anywhere were then issued to private contractors for the first time. A dozen deep test borings resulted. The first of these, at Hardstoft in the Midlands, became England's record producer by averaging seven barrels a day for several years. The others were unproductive.
