BLACK DIAMOND:

**Help to save coal by
conserving electricity**

Long ago, coal acquired the title "BLACK DIAMOND." Coal is precious today because it is a critical war material, because it is needed to run steel mills and railroads and power plants as well as to heat our homes.

Thousands of tons of coal are required every day in Edison power plants to make the electricity used by war plants and homes and business places in this area. If you use less electricity, less coal will be burned! The problem is as simple as that. Anything you can do to save electricity also saves coal.

That is why the Government asks for the utmost conservation in your use of electric power. Be careful in your use of electric appliances and equipment—turn off immediately when the task is completed. In home or office or factory, turn off lights not in use. Clean lamp bulbs and reflectors regularly. Don't leave the radio turned on when not listening to it. "Share the light" so that one lamp can serve two or more people.

These things are small in themselves. But this conservation program, which includes ALL utility services, will save thousands of tons of coal vitally needed for war. The Detroit Edison Company.

CONSERVE ELECTRICITY
Even a 5% saving in the monthly use of electricity by Detroit Edison customers will save about
