### PROSECUTOR CANDIDATE

Municipal Judge Earl N. Nash of Ferndale became a candidate for the Republican nomination for prosecutor by recently filing his petitions.

Nash, a graduate of Valparaiso University, received his degree in law from the Detroit College of Law in 1919 and thereafter opened his law office in Ferndale with Calvin N. Smith, later becoming third member of the firm of Smith, Nash and Pence.

He served two terms as assistant prosecutor and resigned to be-

come associate counsel with the attorney general in the widening of Woodward Avenue through Ferndale.

He has been municipal judge of the city of Ferndale for 13 years, and before becoming judge was associate justice for four years, and served five years on the county board of supervisors.

His statement regarding the office he seeks follows:

**Pledge**  
Judge Earl N. Nash  
"As prosecuting attorney, I will give my entire energy to the performance of the exacting duties of this office. I will actually work in the preparation and trial of cases and in harmony with my aides.

I will give to the office of prosecuting attorney and to every mayor, city attorney, peace officer and law enforcement agency throughout Oakland county, every decent measure of cooperation.

I will perform my duties without prejudice against any person or group of persons. I believe in hard work, constant efforts, and in getting results. I will be a prosecutor, not a persecutor or a policeman.

I will give to those who are employed, the same consideration and treatment that I will accord to those who employ.

I hold high hope for the youth of my country. I will give to them and to the solution of their problems, all of my heart and energy. I will combat the cause of and hasten the remedy for juvenile delinquency.

I will give to my country, and to the quarter of a million people within my county, the experience, judgment and ability that I have acquired in the 25 years of successful legal practice."

**Country Deposits** — Up 137 Per Cent. Demand deposits in country banks (consisting largely of ordinary checking accounts) increased 137 per cent from 1940 to April, 1944, according to the Bureau of Agricultural Economics. Such increases have led to a fund more than twice that of four years ago, could cause inflationary trouble if country depositors began using their funds to bid against each other for the purchase of land at increasing prices, the BAE advises. Already land values have risen almost two-fifths above their pre-war average—an increase that is inflationary in many areas.

Furthermore, in some of the principal farming areas the volume of land sales in 1943 surpassed previous high levels reached in 1919 and the number of farms resold after only a short period of ownership increased. Following the inflation of land values during the last war, land prices broke sharply in 1920.
