Mother'll Understand

if you don't call her on Long Distance this Sunday

Mothers are understanding and patriotic. They know that under the steadily increasing burden of war-created calls, Long Distance telephone equipment is seriously overloaded.

Of course, they'd like to talk with you on Mother's Day, but they'd rather be sure the lines are kept clear for vital war messages.

This year, send your love in a letter. And if you'd like to give your mother a present, she'd really appreciate a United States War Bond—a gift of fighting dollars to back our boys and girls overseas.

Please make only really urgent Long Distance calls this Mother's Day.

THE OLD JUDGE SAYS...

"Glad you dropped in, Judge. I was just trying to explain to Mary what you told us down at lodge last night...about all the grain used to distill war-alcohol not really being used up. She didn't realize it, either."

"It's true, Mary. Wherever the government has permitted distillers to purchase the equipment necessary to reprocess the used grain, at least 50% of the feed value (25% by weight) of the whole grain is being recovered and returned to farms like yours in the form of premium-quality live-stock feed. Only the starch is removed during distilling...the part recovered is a highly-priced concentrate containing valuable proteins, fats and carbohydrates. The distilling industry really has taken a leading part in the development of new cattle and poultry feed products from reprocessed grain...products rich in vitamins B1 and B6...so essential to satisfactory growth and production. And the recovery of grain will apply also to the making of whiskey when production is resumed."
