But Live Paint PROTECTION WILL MAKE THEM LAST
"Scientific Tests Show That Pittsburgh's "Vitolized Oils" Keep Paints "Live" and Elastic

CHECK UP on your property and your household equipment. Do they need repainting? Then—in these uncertain times—better not put it off. Do the job NOW with Pittsburgh Live Paint—and your possessions will be protected for years to come.

Pittsburgh Paints stay "Live" and elastic because they are enriched with "Vitolized Oils," which remain in the paint film and prevent it from becoming dry and brittle. Because of the "Live" quality, Pittsburgh Paints retard cracking, peeling and blistering. In all our experience in the paint business, we've never seen their equal for giving long, trouble-free protection on every type of surface—brick, wood, plaster, concrete, or metal.

Gas FIGHTS FOR FREEDOM TOO

Every shell fired at the enemy requires a number of heat-processing operations in its manufacture. And gas, that quick, clean, automatic, easy-to-control fuel, is widely used by industry for this important war production job. Everyone is asked to remember that the same fuel that is used in our homes for cooking purposes, provides the heat that helps to produce shells needed by our fighting men. We must SAVE it wherever possible. We must all do our part to keep our war plans humming until victory is won.
