Physicist's Discover New Soap Helps Army

Wash in Cold Sea Water The United States lighthouse service in peacetime operates 33,000 navigational aids ranging from lantern To help the army keep clean, even when it has to wash in cold sea water, a new soap ingredient from petroleum has been developed. igational sidir ranging from lanterna burg on posts along our great rivers to the 9,000,000 candiepower beam of a modern lightbouse. With our entrance into the war, the lightbous service came under the direction of the United States coast guard and the jurisdiction of the United States navy. The peacetime operation of a lighthouse was made possible by a 19th century physicist who discovered that lenses and prisms could be so arranged and manipulated that they would collect and concentrate even a feeble flame and multiply it into a tremendous beam of many candiepower.

petroleum has been developed. Mixed with the other constituents of soap in a proportion of about one to two, the new material will remove dirt, pil and grease in any kind of water, sait or fresh, cold or hot, hard or soft. Soldiers about transports and on the atou water is sought to be soldiers about the soap water between the soap water is sought to be soap with the soap were efficient for these purposes. It also gives a good shave.

good shave.

After the war, variations of this soap formula will be available for household use—some after the same and others will implice the task of variant greaty pans, will make alsasware sparkle, and will quickly erase road film from your car. This type of soap fathers well and leaves very little "ring" around the tub.

trained from their varieties of the start of

Miss Jean Browe were among the 24 guests.

Mr. and Mrs. Deno, with Betry Lou and Al were at Bay City last week visiting Mrs. Deno's mother, who is quite ill.

Corporal Stevens spent four days this week visiting friends in Milwaukee.

Methodist Young People Plan Social Evening

The young people of the Methodist Church will eajloy a hize next Sunday evening, starting from the church at 5:00 pa. This

After putting the press cloths over the woolen garment, press, do not iron. Use the patting motion rather than the back and forth ironing mo-tion. Patting instead of ironing pre-vents the nap from being fattened and the garment from becoming shiry. Do not press wool material entirely dry.

"A Time to Fight"

The congregation of the Lutheran church in Woodstock, Va., knew that Pastor John Peter Muhenberg was preaching his last sermon on a Sundary, 1776, but did not know why. Toward the end he utcred the words "There is a time for preaching and praying, but also a time for battle, and such a time for the continuation of the continuation in the uniform of a colonel of the Continuation and battle, and between the continuation of the co

SCHOOL CHILDREN FACE GREATER TRAFFIC DANGERS

Michigan's more than aine hun-dred thousand returning school children face greater traffic dan-gers than in many years, it was warned today by Ernest P. Davis, director of the Safety and Traffic Division of the Automobile Club-of Michigan.

MICHIGAN.

The warning went to achool authorities reorganizing the 2217 schopl safety patrols throughout the state equipped and instructed by the club, if the nearly twenty years the safety groups have been operating.

perating.

"Unless we redouble our ellertunless this school year," said Davis,
we shall never duplicate the
great record of safety these parols achieved last year. Here are
few reasons for the greater danset ble reasons for the greater danthis year;

- "1. Fewer police officers.
 "2. War-deteriorated traffic sig

tremendous beam of many candle-power.

Typical of what his discovery, made possible is the 520,000 lens of the Navesink (N. J.) lighthouse where a modelepower all gight that probes easily through 22 miles of darkness.

50,00,000 candlepower, a light that probes easily through 22 miles of darkness.

The provides in a pot of lu-bricating mercury, six times a min-tuc. It sends beams in two direc-tions at once, giving two flashes to a revolution. It flashes at the same spot every five seconds, thus giving ships near Sandy Hook vital direc-tional information. NEW YORK—Lieut. Henry Buckley of Medford Mass., voting offi-cer aboard a Coast Guard Combat cutter, explains to some of the ship's crew the requirements for voting in the coming presidential election. Left to right, are: Bertram Edwards, SC 2/c of New York; Charles Simpson, S. 1/c of Alexandria, Va.; George McPhall, Radioman 3/c, of Camden, N.J.; Lieut, Buckley; James Kenah, MM 1/c of Brooklyn, N.Y.; Artiur Rimmeie, SM 2/c of Newark, N.J.; L. A. Wolgast, SC 2/c of Indianapolis, Ind., and George Miodak, RM 3/c of Chicago, III.

Clean Powder Puffs to

Prevent Germ Collection

Clean Powder Fuffs to
Prevent Germ Collection.

Every woman knows that a clean
powder puff is the order for the puff
of the compact.

Every woman knows that a clean
powder puff is the order for the puff
of the dressing table as well as for
the puff in the compact.

Both puffs and pads can be used
and reused if given proper washings,
so that the small supply on hand
now can be kept in service for many
months. Puffs that have a filling of
surgical cotton, as most of the velour
puffs do, can be washed most
easily if the stitching is loosened
for about an inch stitching is loosened
for about an inch and the cotton
is removed and thrown addre as posshible, then soak the velour cover in
luckewarm suds. If face reem or
foundation cream has made the cover
greasy, fairly warm suds and light
rubbing will be necessary to disslove the smudges. When the puffs
sre throroughly clean, rinse in clear
indewater water. Pat out the excess
moisture on a soft cloth and dry flat,
The velour texture can be restored
to a large extent by gently fingering
the farbic after it was of control, sew
you the opening, and the puff is ready.
The soft felt-like pads used in compacts can be washed without any
peccal trouble. Simply sook in suda
«tter flipping out as much powder
as pessible, dunk up and down until
slean, and then rinse and dry.

Oil From Tomato Seeds

Oil From Tomate Seeds
A source of oil that should not be
overlooked in the United States is
the oil that can be obtained from tomate seeds. Every year huge quantities are processed in the canneries
of the United States. Jamieson
(1952) states that seeds constitute
from 5 to .6 per cent of the tomate
fruit.

ruit. Recent experimental work shower Becent experimental work showed that the ether soluble material of dried tomato seeds extracted in a Soxhlet apparatus for eight hours amunited to over 20.62 per cent. It was also reported that when the whole residue of tomato cannot cannot cannot be suffered to the contract of the con

- obtained.

 The analysis of the residue yielded the following data:

 1 Ratio of pulp to seed—approximately 1.6 to 1.

 2 Moisture content of the residue
- 2 Moisture content of the 227.1 per cent.
 It was estimated 250,000 pounds of oil tould be obtained from the resi-

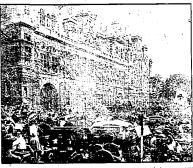

Mind Stains

Mind Stains, especially on children's clothes, are armong the most frequent clothes cleaning problems in spring time. Must stains are not defined to remove it dealt with promphy amount of the stain are not spread to the stain are not spread to the stain are spread to the stain and the spread to the stain and the spread to the stain with early and the spread to the stain with denauter all cholon. For rayon and colored clothes use dillustrated alcohol. There as much water as alcohol is the proportion. Must often does more damage to leather than to tabrie. If left dry on shoes it may make a permanent stain. It should be removed to the stain with dealth and the stain and the stain. To clish shoes when stry.
