Pressure Coeker

Before closing the petook on the pressure cooker, allow the steam to escape at least seven minutes. This gives sufficient time for all air to be released. If the petook is closed sooner, the air pressure will cause the gauge to rise, but this is not an indication of the amount of ateam pressure in the cocker It is necessary to have steam pressure.

## War Bonds as Investment for Farmers

by Warren W. Hawley, Jr., President New York State Farm Bureau Federation

Pic Orville Robertson has written his parents that "I am in France, it doesn't seem real. Here it is almost supper time, and you haven't even thought of eating, butch yet. There is seven hours difference in the time. We had a good trip over. We had our own rooms on the ship, and I didn't get you see sick. The people seem friendly, but they look sort of odd. The houses are nearly all made or stone and the roads are real navrow." IN CHECKING figures of the Farm Credit Administration, I find that farmers are paying off mortgages faster than at any other period in the history of the Federal Land Bank.
