Prevent Heat Strokes
 When a horse collapses on a hot day, heat stroke should be suspected. Relief can be given by the application of cold water and by the administration of salt solution under the supervision of a veterinarian. It is much better, however, to prevent heat strokes by frequent watering, providing plenty of salt and allowing frequent rest periods during extremely hot weather.

NOTICE
 The 1936 Chevrolet truck and 1941 Ford Pick-up will NOT be sold at the Bruce Auction Saturday, October 14. 52-14c
