Bad Axe

Lights the Way!

The main street at night

6000 LUMEN OVERHEAD STREET LIGHTS
2500 LUMEN OVERHEAD STREET LIGHTS
1000 LUMEN OVERHEAD STREET LIGHTS

In 1938 the forward-looking leaders of Bad Axe asked Detroit Edison engineers to provide the community with better street lighting. And they got it: modern directional luminaires... twice as much light... more than threefold improvement in visibility... off at a remarkably small extra cost per year because of the higher efficiency of larger lamps!

And the engineers solved the problem of that alley behind the main street. They placed 6000-lumen overhead lamps where the alley intersects the side streets, thus (a) lighting the alley and (b) the parking areas off the main street; (c) building up light intensity approaching the main street; (d) helping to promote business activity on the side streets.

The residents of Bad Axe are enthusiastic about their street lighting, which protects children and pedestrians... does the motorist a good turn... helps merchants... and gives additional sparkle to the town.

How is the street lighting in YOUR community? Our engineers will be glad to discuss a postwar plan now.
