American Eagle
Although often-dime pictured as
such, the Golden Eagle is NOT the
Symbol of American liberty. The
Bald Eagle has that distinction. The
Bald Eagle is NOT realty bald, The
white feathering on the neck and
head makes him appears so, when
observed from a distance. During
the first year of their lives the young
of the Bald Eagle grow to be
larger than either of the parents.
The wing-spread is often as much
as 12 inches wider than that of the
older birds.

Licorice Root
Licorice root is now growing wild
in relatively small patches in the
Middle West, West and Southwest.
In addition to food and medicine, it
is also a constituent of fire extinguishing foam compounds.

Icing the Cake
Moisture in the air on a damp or
rainy day may make icings and
other sweets soft and sticky. To
offset this tendency, icings and other
sirup products need to be cooked
slightly longer on damp days.
