

GARBAGE TRUCKS MUST BE COVERED

In a statement released today, Russell Colton, Sanitarian for the Oakland County Department of Health, declared that all trucks hauling garbage must be provided with covers. During the past few days several trucks have been stopped and the drivers warned that covers which will prevent the littering of highways with garbage and refuse falling from their trucks must be provided. In cases where the trucks were owned by

municipalities notices have been mailed to the governing body. We are doing all we can, with our limited personnel, to cooperate with other departments and agencies to halt the illegal practice of depositing garbage and refuse along the highways. This unsightly and insanitary practice not only adds considerable to the expense of the Road Commission but in some areas is creating a menace to public health. Most of the cities, villages and townships are now providing public refuse dumps, however it may be necessary to establish others especially to serve the population of congested outlying areas.
