Plastic Eyes Provided
Plastic artificial eyes which duplicate the appearance of natural eyes and which are superior to glass eyes, have been developed by the optical industry in the United States for use of wounded veterans, according to the Better Vision Institute. The iris, pupil and veins of the sound eye are matched in pattern and coloration by the artificial eye. The eyeball is built up layer by layer of plastic so as to obtain a natural effect.

Lambskin Subs for Seal
A fur resembling seal skin is made from lamb skin by taking the kink out of the wool.

ANNUAL MEETING HELD JUNE 4 IN BOSTON

Lasting world peace has its roots in the permanency of divine laws and cannot be expected to rise from the foundations of selfish decisions and aims. The Christian Science Board of Directors told the annual meeting of The Mother Church, The First Church of Christ, Scientist, in Boston, today.

Commending the efforts of the California peace conference to evolve a practical basis upon which nations might outlive war, the Directors pointed out that these efforts would be successful insofar as they reflect the operation of God's government in human affairs.

The Directors' message featured the fourth annual gathering of Christian Scientists to be held under the restrictions of wartime travel. The audience reflected the desire of the Directors that Mother Church members living beyond the 50-mile area of Boston should abide by the requests of the Office of Defense Transportation and remain at home this year.

Highlighting the meeting was the election of Mrs. Myrtle Holm Smith of Waban, Massachusetts, as President of The Mother Church for the ensuing year, succeeding Paul Stark Seelye, and the reelection of Roy Garrett Watson, Treasurer, and Mary G. Ewing, Clerk.

Christian Scientists heartily concur in the purpose of peace conference representatives in California to find ways and means to prevent war, the Directors stated. They saw these efforts as making practical the Sermon on the Mount.

The Directors stated that membership in The Mother Church was now four times greater than it was 25 years ago. There is a growing awareness, they said, of the need for unselfish service to God and his law. Without frankness and honesty in the world, they added, "we have a whirlpool in which there is no steadiness and no rest."

The Directors also paid tribute to the faithful chaplains and wartime ministers who are "bringing comfort, healing, and spiritual strength" to thousands of men and women in the armed forces.

Stating that the greatest catastrophe to overtake the human race was the loss of the true import of Jesus' life and teaching, the incoming President attributed that loss to Jesus' followers reverting to their old way of thinking and living, or "trying to graft the new onto the old." She cautioned against the human race losing its spiritual gains of more recent years for the same reason.

That the religious rights of individuals are beginning to be recognized by those outside Christian Science was revealed by the

Committee on Publication which pointed out that recently in California Christian Scientists were exempted voluntarily from proposed health insurance legislation sponsored by Governor Earl Warren and the C.I.O.

Radio activities of The Mother Church have been extended, the Committee reported, as the result of a weekly program launched over 113 stations, consisting of electrical transcriptions recorded from the auditorium of the church. These are broadcast throughout the United States and in Canada, Hawaii and the Canal Zone.

The Trustees of The Christian Science Publishing Society reported the most active year in the Society's history, measured in terms of circulation, advertising, and total business volume. The Christian Science Monitor, another publication of the Society, all reached new highs in circulation, they said. The Monitor's Paris branch has been reopened and overseas activities "will be privileged to do so."

More than 1,000,000 lines of new advertising were added to the Monitor's columns and its magazine, both of which contain high volumes, it was stated. The Trustees indicated that many important developments were in the store for the Monitor in the postwar era, and to this end orders have been placed for new presses and other printing equipment of the finest quality.

LADENE PAXTON IS BRIDE OF EDWIN SCATES

At the Farmington Baptist parsonage on Saturday, June 9, at three o'clock, Ladene Paxton, the daughter of Mr. and Mrs. Clyde Paxton of Belding, became the bride of Pte Edwin H. Scates of Camp McCoy, Wisconsin, son of Mr. and Mrs. Edwin A. Scates. A double ring ceremony was performed.

The bride wore a street-length dress of light rose, with navy accessories. Gardenias were her corsage. Her sister, Shirley, of Belding, was her only attendant and she wore a light gold dress with a corsage of talisman roses.

James W. Scates assisted, his brother as best man.

Mrs. Paxton chose a gray and white print dress for her daughter's wedding, and had a corsage of pink roses and carnations. Mrs. Scates, mother of the groom, wore a lavender and white print dress and a corsage of tea roses.

Following the wedding a reception was held at the church parlors for relatives and friends. Guests were present from Belding, Brown City, Howell, Northville, Pontiac, Yale and Farmington.

MICHIGAN BELL ANNOUNCES RURAL PROGRAM

The Michigan Bell Telephone Company today announced plans for a \$7,500,000 rural program within 3 to 5 years after manpower and materials are available.

Theodore H. Dawson, director of the company's rural operations, said the program will include improvements in the quality of the farmer's service as well as extension of its scope. He pointed out the program will help provide jobs not only for the company's 3,000 employees in its farm forces but for many others as well.

The postwar undertaking primarily will be an expansion of a rural program that has been under way for a number of years. In 1940, the company, in cooperation with Michigan agricultural leaders, set up a plan for customers to pay for farm-line construction through small, monthly installments. Since then, the company has installed service at nearly 14,500 additional farms, including 4,500 where construction was necessary. As a result, rural installations have increased proportionately at a faster rate than urban during the war, Dawson said.

Dawson disclosed that two-thirds of all rural homes in Michigan Bell territory are located along existing pole lines and about half of those homes now have telephone service. He estimated that 75 per cent of rural families in company territory live along existing lines or near enough so that service can be provided without special construction charges. The company plans to take advantage of research developments to extend the service on an economical basis. It already is using long-span steel wire construction with distances of 350 to 450 feet between poles compared with 125 to 200 feet in former days. The company also has been using a new type, rubber-covered wire which is buried by a special plow. Under consideration is the installation of small dial switching units near groups of farms, providing farm families more direct communication among each other and reducing the amount of line wire required to connect them to the telephone central office.

Possibility of extending the service through new research developments interrupted by the war in the picture. In cooperation with the Rural Electrification Administration and private power companies, the Bell Telephone Laboratories have been working on a means of providing service through the use of power lines. That method, known as "power line carrier," makes it possible for a high frequency current, carrying conversation, to "hitch hike" a ride along a power line and hop off to a pair of telephone wires serving the farmer's premises. Carrier also may be applied on telephone lines to provide more circuits over existing routes. Micro-wave radiotelephone systems may be employed to provide service in isolated areas. Radiotelephone systems already are in use by the Michigan Bell

to bridge gaps brought about by storm damage and to provide ship-to-shore service in the Detroit-Pontiac-Huron lakes area.

Dawson said the company will continue its program of converting the few remaining magneto-operated telephones to dial or common battery service and of reducing the number of parties on the line where excessive.

Puppet Shows Ancient

Puppet shows are old in history. China and India are both credited with their origin. India has this evidence: the word for stage manager in ancient Sanskrit was "thead-holder."

Removing Iron Rust

If lemon juice is squeezed over spots of rust in iron water pails and dippers and allowed to stand several hours the rust can be removed. If one application fails to do the job, repeat.

Mrs. Marie Cronin of Grosse Pointe has been on the sick list, but we are glad to report her improvement.

THE OLD JUDGE SAYS...

"FRED: 'Is it true, Judge, that a war can't be won without the use of war-alcohol... the kind the beverage distillers have been producing for the government for over two years?'"

OLD JUDGE: "That's right, Fred. It is a basic ingredient in the smokeless powder used in virtually every firearm from a pistol to a 16-inch gun. And, in addition, it plays

a more human role. The medical supplies which our military doctors use to alleviate pain, combat infection, save lives are prepared with war-alcohol."

FRED: "No wonder, then, more and more people are recognizing the great contribution our beverage distillers have made to the winning of the war with their double-duty product."
