

Behind Your Bonds Lies the Might of America

CHEESE

American cheese will add to the Nation's post-war prosperity that War Bond buyers will share. Expansion of the business is predicted. Almost half the Nation's cheese is Wisconsin-made. In 1942 the state turned out \$13,250,000 pounds, most of it American cheese. Swiss, Cheddar and Italian cheese are made in impressive quantities. This department of the dairy business helps build our national income and helps to make War Bonds the best investment in the world.

U. S. Treasury Department

Obituary

Vern W. Davis

Mr. Vern W. Davis of 2014 Austin Drive, Walled Lake, passed away suddenly Tuesday morning following a heart attack. Mr. Davis was an employee of the Chevrolet gear and axle division in Detroit, he also operated tourist cabins at Walled Lake.

Vern Davis was born April 21, 1887 in Ada, Ohio, the son of Wm. and Hattie Davis. He was married in January of 1912 to Anabel Provencher and they have made their home in Walled Lake for the past six years.

Funeral services will be held Friday afternoon at 2:00 p.m. from the Thayer Funeral Home with Rev. Fred Fisher of the Farmington Baptist Church officiating and burial will take place in Oakland Hills Memorial Cemetery.

Surviving Mr. Davis are his wife, Hattie, and one son, Pvt. David Davis, also four brothers, Harvey, Milo and Owen of Lansing and George of Royal Oak and one sister Mrs. Marie Robinson of Roscombe, Mich. He also leaves two grandchildren.

Lamp Engineer Goes Firefly One Better

Firefly One Better

The firefly has long been held up as a model to the lamp engineer, because of the erroneous belief that its light is produced with almost no energy consumption. The lamp engineer has done much better. A new type of glow lamp, of the same average size, emits continuously more light than hundreds of fireflies with an energy input that in a year's continuous burning does not add up to one kilowatt hour. In a year, at average domestic power rates, it consumes less than three cents' worth of electrical energy.

The glow lamp actually is a miniature fluorescent lamp. A discharge takes place in a rare gas and the resulting radiation (invisible) is converted by phosphors on the inner wall of the bulb into a soft green glow. A tiny resistance in the structure serves as ballast.

The green light from this lamp fortunately falls in the region of maximum night sensitivity of the eye. Held beside a neon glow lamp of the same wattage in the daytime, the two lamps would be judged of equal brightness. However, to dark-adapted eyes the green glow lamp appears four times brighter. Thus, the green glow lamp is ideally suited as a night light in bedrooms, stairways, and halls.

Best Treatment for Shock Is Prevention

Best treatment for shock is prevention, according to Dr. Robertson Ward of the University of California. Anticipation of shock and its avoidance is better than treatment; in this the layman at the scene of the accident can assist by a few simple precautionary measures.

Bleeding from a wound should be stopped by a pressure dressing or by pressing on the pressure points, rarely by tourniquet. The injured person should be kept warm and in a prone position. Usually the person in shock should have his feet a little higher than his head. When medical treatment is likely to be delayed, sulf powder should be sprinkled into the wound.

An accident victim should not be picked up and crowded into the back seat of a car, but should be moved by an experienced ambulance crew. Rarely is a traction splint indicated; much harm can be done by one. Better first aid technique is to make a splint by wrapping a pillow around the broken limb and tying it above and below the wound. Newspapers or boards can be used for stiffening.

Fire Hazards

It is the duty of every parent to keep constant vigil in the home to reduce fire hazards which may exist because of the physical make-up of the house, personal habits of the family, or unsafe housekeeping methods. A good place to start as a self-appointed fire inspector is with the heating system. If you use a fireplace, be sure to have and use an adequate screen as a shield against sparks. Defective flues or more home fires than any other thing; check to see that there are no cracks, see that stovepipes are in good condition and correctly installed a safe distance from any wood. A chimney in good repair may even be dangerous if it is allowed to become clogged, so keep the flues open. Ashes are not always as dead as they seem and for that reason should be deposited in metal containers that are fireproof.

Read Magnet

A road magnet of the Minnesota highway department collected the amazing amount of 2,580 pounds of metal tire shreds. When it is considered that this haul averaged 100 pieces to the pound, it will be seen that over a quarter of a million pieces which might have injured tires have thus been taken out of circulation and added to the nation's scrap drive. This important highway service was given at a cost of approximately \$1.00 per mile which covers all expenses involved in the operation including depreciation of equipment used. The electro-magnet bar is 8 feet long, which required four passages over a 32-foot highway. On paved roads, the magnet treatment was applied only to the shoulders, since pavements and bituminous surfaces are relatively free of scrap metal. Cost of one passage per mile is estimated at 30 cents. The unit travels 10 miles per hour.

Shade Trees

Early spring is an excellent time to feed shade trees, as well as fruit trees. Keep your trees thrifty, for the more vigorous the growth of a tree, the less subject the tree will be to disease and insect attack. Make application of plant food about the time buds are swelling. A series of holes should be made in a zigzag fashion under the drip of the branches; the most satisfactory instrument to use is an earth auger, obtainable in hardware and gardening departments. Make holes about 2 inches in diameter and 8 inches deep. The amount of plant food needed is determined by allowing 3 pounds to each inch of diameter of the trunk, measuring the trunk 4 feet above the ground. Fill the holes with a mixture of half plant food and half soil. Then water thoroughly.

Service Notes

Mrs. Henry Dehanke has received word from Henry Morrow, S 1/c, who made his home with the Dehanke's. It was the first they had heard from him in several months.

Pvt. Alford Holmes arrived home Tuesday from Fort Riley, Kansas to spend a fourteen day furlough with his mother, Mrs. Mae Knight and family.

Henry Dehanke has been promoted to Sergeant. He has been overseas twenty-one months and has earned eighty-two points, and seven battle stars.

Cpl. Winston Edgar has returned to Denver, Colo., after a furlough with his parents, Mr. and Mrs. John Edgar.

Pfc. Fred Marindale arrived on Monday, July 16, to spend his furlough.

Arthur S. Olsen, CPO, Merchant Marine, has just arrived from the Pacific Theatre of War to spend a 30 day leave at his home on Randall Road.

Pvt. Allan Terreault, formerly of Farmington, writes he is seeing the country. Having spent the last part of April in Maryland, May in New York, New Jersey and Washington, D.C., and June in Kentucky. He is now stationed at Camp Adair in Oregon and will be leaving there soon.

Theodore J. Kohman, of Farmington, has recently been accepted for enrollment in the U.S. Maritime Service and is now undergoing basic training at the Maritime Service Training station, at Sheepshead Bay, N.Y.

Staff Sgt. Arthur Metzler has returned home from overseas for a 30 day leave. He has brought back several pictures and souvenirs. Upon arriving home he was informed that his brother, Gerald, had received a broken leg. Staff Sgt. Metzler will be at home to his friends, 2030 St. Francis.

July 12, 1945.

Somewhere in the Pacific Dear Sir:

The other day I received the May 21 issue of the Enterprise, in which was stated, in order for men who are overseas to receive newspapers they must write to the publisher and request having the paper sent to them. I have meant many a time to write and thank you for the paper. Your paper has followed me on a great many different places out here in the Pacific. Sometimes it is three months old. Then other times it

looks like it went through a few battles to get to me. Regardless how old it is it always brings news from the home town. I'm on a L.S.M. We have been on one invasion so far and that was at Okinawa. The Japs throw suicide planes at us but they were shot down. I've seen a lot of the Pacific and its islands. I have gotten around out here a great deal, but I still haven't run into any of the fellows from the home town.

Sincerely,

Vladimir Regentk Cox.

June 19, 1945
Farmington Enterprise,
Farmington, Michigan:

I enjoyed your paper immensely and it is a time way of keeping in touch with my friends and former classmates. Many of whom I don't have time to write.

It'll probably be many months before I'm home again, so please keep sending the Enterprise.

May I thank you again in closing.

Yours truly,

Leonard King, Jr., S 1/c

Robert C. Van Every, 13, son of Mr. and Mrs. M. M. Van Every, 3215 Orchard St., Farmington, is receiving his initial Naval indoctrination at the U.S. Naval Training Center, Great Lakes, Illinois.

Oscar Auten, S 1/c, is spending a few days with his parents, Mr. and Mrs. Ralph Auten.

Pvt. Ed. Norton arrived home last Wednesday from Camp Maxey, Texas, for a 13 day furlough before going to Camp Riley, Kansas.

Cpl. Terence McKelvey is enjoying a 73 day furlough with his parents and friends, prior to a discharge from service in September.

Lily Mitchell received her final order to report to the WAVES. She left Detroit for Hunters Creek, N.Y., on July 25, 1945. She is the daughter of Mr. and Mrs. O. S. Mitchell, Floral Park.

Mail was received from Pvt. Betty Knoll who left for the WAVES on July 27, 1945. She is stationed in Des Moines, Iowa, for her basic training. She writes she is enjoying her training very much.

Mr. and Mrs. Richard Heliker and Mr. and Mrs. Richard Banfield are spending a picnic dinner at Cass, Benton Park Monday evening.

Alden Green and Wendel Green spent last week in Canada on a fishing trip.

Mr. and Mrs. T. J. McDermott and son, Jack, of Buffalo, N.Y., spent last week at the home of Mr. and Mrs. S. B. Kennard and Audrey, of Purlingboro Road.

ATHLETES FOOT ITCH

STOP IT IN 5 MINUTES

Successful treatments must be more than just symptomatic. Most remedies are surface applications. Requires a STRONG PENETRATING MOBILE liquid. Alcohol is VERY MOBILE. Va. superior. It penetrates 90%. REACHES MOISTURE, GREASE, PERSPIRATION, IT PENETRATES. Most athletes have the foot itch. Small supply just arrived at South-Bradley Drug Co. July 25.
