

**VICTORY**

**Civilians At Peace**

The Government needs and asks its citizens in this second week of peace to:

1. Use the nearest of 1,000 United States Employment Service Offices to locate a job or a worker for a job. By using these clearing houses you will avoid turnover, duplication, and lost time.

- and travel in the job shifts during reconversion.
2. Eat and store potatoes to avoid spoilage of this nourishing cheap and plentiful food. The 1945 crop is expected to be one of the largest on record.
  3. Postpone your pleasure travel a few months longer. Leave the trains free for more comfortable journeys for troops who will soon be returning at the rate of 500,000 a month.

**Reminders**

- Meats, Fats: Red Stamps** Q2 through U2, void August 31; V2 through Z2, void September 30; A1 through E1, void October 31; F1 through K1, void November 30; L1 through P1, void December 31. Next stamp becomes valid September 1.
- Sugar Stamps:** Stamp 36 void August 31. Next stamp becomes valid September 1.
- Shoes:** Airplane stamps Nos. 1, 2, 3, 4 in book three continue valid indefinitely.

**Planes For Memorials Available From OPA**

Surplus Aeronautical property may now be used by state and local governments for memorial as well as educational, research and experimental purposes, the Surplus Property Board announced. As in the case of educational distribution, some of the equipment may be used for flight purposes, and the recipient must pay the cost of transportation. Although many communities may wish to acquire surplus bombers and fighters as memorials to their citizens who fought for their country, the Board urged that great care be taken in preserving such aircraft and recommended that all memorial aircraft be kept under suitable cover to prevent deterioration.

State and local governments desiring to make application under this new provision should write to Russell Heddleston, Chief Educational Disposal Section, Reconstruction Finance Corporation, at Washington 25, D.C.

**WPB Lifts Controls On Consumer Products**

In a series of sweeping moves to facilitate the reconversion of industry and speed the flow of a wide variety of peacetime products into the hands of consumers, while still avoiding price inflation, preemption of scarce supplies, or a buyers' scramble, the War Production Board has dropped 210 more individual controls over industry. J. A. Krus, WPB Chairman, says.

Limitations on the number of radios, refrigerators and trucks that could be manufactured for civilian use were removed. Restrictions on a long list of other products were lifted and the materials freed for consumer goods. Affected are metal furniture, domestic stoves and laundry equipment, electric fans, motorcycles, storage batteries, photographic film, shipping containers, oil-burning equipment, silk and cotton duck as well as a large number of other products.

**Household Goods In Stores This Fall**

Household washing machines, irons and aluminum kitchenware will be back in the stores this fall at 1942 prices, according to Price Administrator Chester Bowles. Manufacturers will be required to tag the pots, pans, skillets, washing machines and irons with their ceiling prices, Mr. Bowles says. Models will

vary in style and price much as they did before the war.

**Class 2 Slaughterers Quota Period Changed**

The date of the beginning of quota periods during which class 2 slaughterers may slaughter 100 per cent of their quota bases for cattle has been changed to quota periods beginning on or after August 1, 1945.

A class 2 slaughterer, during a quota period may, carry over to the next consecutive seven days or that period any unused portions of the part of the quota for each species of livestock he was permitted to slaughter during preceding consecutive seven day periods in the same quota period, OPA says.

Class 2 slaughterers whose quota bases have been reduced, removed or canceled by OPA under its Slaughter Control program are entitled upon request to a hearing on the issues involved before a special hearing officer, OPA says. The hearing officer will be the OPA District Director or an OPA employe designated by the District Director. After the issues have been reviewed, the hearing officer will determine whether or not the OPA District Office action reducing the slaughterer's original quota bases was justified, and

to what extent, if any, the quota bases will be restored.

**New Ration Stamps Valid September 1**

Five more red stamps in War Ration Book Four will be good for the purchase of rationed meats, fats, fish and dairy products on Saturday, September 1, OPA announced. The new stamps are L1, M1, N1, P1 and Q1. They are

being validated for the usual four months' period—in this instance, September 1 through December 31.

Sugar stamp 38 in War Ration Book Four also will be good September 1, and will remain valid for the purchase of five pounds of sugar through December 31.

**BUY U.S. WAR BONDS!**

**Close Fastener**  
When washing a garment that has a side fastener, close fastener to keep it from cutting into the cloth and to prevent fastener from becoming clogged.

**Ironing Rayon**  
To prevent rayon from acquiring a "glassy" look, iron it on the wrong side with a warm iron.

**Spotted Targets Through Darkness, Smoke or Fog**

**The Bell System — the largest source of Radar for our fighting forces**

This is not surprising for Radar development and production stems from the same roots that produced and continue to nourish this country's telephone system.

Radar, the instrument which enabled our land, sea and air forces to spot enemy targets through darkness, smoke or fog, was one of the outstanding new fighting instruments of the war.

Two years before Pearl Harbor the Government asked Bell Telephone Laboratories to put its wide experience and knowledge of electronics to work to help perfect Radar as a military instrument.

From then on, the Laboratories cooperated closely in the Radar program with the National Defense Research Committee, with Army and Navy specialists, and with scientists of Great Britain.

The Western Electric Company, manufacturing branch of the Bell System, became the Nation's largest supplier of Radar systems. One type it made was universally used by B-29's in the Pacific for navigation, target location and high altitude bombing. Another played an important part in aiming the guns on our warships.

If you're waiting for a home telephone, it helps a little to know that Radar is one of the reasons. For years telephone manufacturing plants were devoted to war needs.
