WHY...

It's always a pleasure to have come flower start to bloom later, when one has becomes customed to all the others in the garden, Asters are the most easily grown, most floriferous of the mid-summer bloomers.

The wild ancestors of our asters can be from China. They's why you often hear them referred to as "China" asters. But the types and varieties available today are a far cry from the wild sater of old.

There are China" asters. But the types and varieties available today are a far cry from the wild sater of old.

WOOD PANELING can be installed with either adhesives (shown at left) or with nails. After applying the adhesive, place the panel (shown in middle), exerting a steady pressure at all contact points. It is advisable to beat the panel lightly with a soft rubber mallet, or harmer and a padded block, to insure good contact. Finish off the new wall with hardwood moldings, first drilling the nail holes with a drill slightly smaller in size than the nail.

Climate Is Vital For Home Plan

mich is the right place, according to Prof. D. Newton Gilck of Michigan State University.

As professor and associated interestor of the University's School of Urban Planning and Landscape Architecture, Gilck model and moderate in summer with a sould interestprospective homebuilders:

"Wide roof overhangs on the south side of a house can control the sum's rays. Rooms receive heat and smulight in winter and are cool and shaded in summer, "he said, He pointed in the sum's rays a good deal of heat comes incognitive that were no overcast days a good deal of heat comes incognitive to the sum's rays. Rooms receive heat and smulight in winter and are root and charge in without the sum's rays and the sum's rays are short, windows on the south side of a house can be in common with the time of the year, The summer sum is high and shadows are short, windows on the south side of a house can be in comfortable areas for outdoor living in July and August in this part of the state are on the north side. During the rest of the year the south side is most pleasant, be said.

Windows on the south side received his state, are on the north side. During the rest of the year the south side is most pleasant, be said.

Windows on the south side received his state, are on the north side of a house can be in comfortable areas for outdoor living in July and August in this part of the state are on the north side of the said.

Windows on the south side received his state, Sart on the well and the said of the sa

shadows,
Glick also collected statistics
of interest to homebuilders:
"Rather uniform precipitation

KALAMAZOO -- Western Michigan University junior Jack Sartore of Berwyn, Ill., was the Mid-American Conference tennis champion in 1987 in number four singles and teamed with Dick Johnson to win the number two doubles title. Putting ahouse, fence, garden or tree in the right place doesn't coat any more thanpeling been and reformary have less than mactic coadians in deciding which is the right place, according to Prof. D. Newton Glick of Michigan State University.

As professor and associate is not a major problem, according to Prof. Planning and School of Urban Planning and Canadaseape Arthlecture, Glick of Glick, because of School of Urban Planning and continued to the control of the University's conding to Glick, because of School of Urban Planning and control of Glick, because of School of Urban Planning and control of the University's conditions of the Control of Contr

The best time for outside painting is late summer or early fall, according to the experts. In these periods, woodwork and other surfaces unally are thoroughly dry due to warm, dry weather and there is less chance of a sudden shower to spoil the paint job.

shower to spoil the paint job, Temperatures areat high and there are fewer-insects to get stuck in the fresh paint and annoy the painter. Late spring is the next best time, Midsummer, take fall and indivinter are least desirable. It is best to start painting in the morning after the dew has dried and to stop before dew falls.

Try to schedule painting a house so that work is done in the shade, Start on the west side in the morning and work around so you'll be painting the east, south, or north exposures in the afternoon with the sun in the west.

BARKING, England.-The new furniture looks fine in Fred Edgecombe's living room but he and his wife are not entirely happy.

The furniture, mordered, was put in their living room while he and his wife were out, their old furniture was taken away, and they do not have the slightest deat of where the new furniture was supposed to have been delivered.

Now you can install an AFCO— Comfortmaker Cooling Unit for whole house Air Conditioning at the lowest price ever.

Install now and enjoy your refresh-ingly cool home all summer. Call your AFCO Deater now for a free estimate.

ALL SEASONS

Hollyhock Is Best Of Tall Plants

One of the best tall plants, that can be growninexpensively from seeds, is the hollyhock, says the American Seed Trade Association,

Association.

In the past, hollyhocks had to be planned for a year in advance since they are blennials and bloom the year after seeds are sown. Now plant breeders have bred varieties that will produce blooming plants the same season, if seeds are sown early enough.

To secure these, make cer-tain you buy seeds of "annuari hollybocks. These may be able hollybocks. These may be able dismply under that designation, or under a varietal name like Madcap. Look for the words "ammal" or "blooms the size "ammal" or "blooms the size "year" in the description in your seed catalog or on the seed packet,

There are other annuals that can be used to add height in appropriate places, Ornamental sunflowers, cosmos and ithonia (Inca's flower) all quality, Each presents a different type of folipresents a diffe age and flower.

Ornamental sunflowers should not be confused with those grown as field crops. The cornamental type is lower growing (4 to 5 feet high) and the flowers are smaller. Depending on the variety selected, they may be colored red, crim-son, cheating as well as wellows.
