Let's Fatten the Goose that Lays the Golden Eggs!

The Payroll Savings Plan was born early in the war. Millions of patriotic Americans hastened to join it. We soon found out that, through it, we were not only helping to win the war, but saving money for ourselves. Saving money regularly, and pretty painlessly. Many of us discovered, for the first time in our lives, an absolutely sure way of putting aside a part of our earnings—of accumulating a cash reserve. The war is over now.

Let's keep up this sure and easy way of saving money! Let's maintain the hopes of financial independence — all the dreams that, through this plan of regular saving, are well on their way toward coming true.

Let's fatten the goose that's laid the golden nest eggs for nearly 30 million people. Let's keep on buying Victory Bonds. Let's keep on buying them through the Payroll Savings Plan.

\$100 REWARD

I will gladly pay \$100 Reward for information that will lead to the conviction of the persons who illegally entered Jahn's Livonia Hardware, 33504 Five Mile Road, and helped themselves to deer rifles, ammunition, shotguns, and .22 automatic guns.

The loss of these supplies not only depleted my stock, but ruined the hunting season for my customers who were greatly in need.

I may be able to replace this stock in time for the season.

IT PAYS TO BE A GOOD RURAL LINE NEIGHBOR

If you're considerate of others in the use of your telephone, they'll be more apt to be considerate of you. And today, when there are more telephones per line than before the war, it's especially important that everyone co-operates.

We intend to proceed with the job of adding more rural lines and more central office equipment just as fast as conditions permit. This will enable us to fill the orders of those who are waiting for telephones and reduce the number of telephones per line.

Meanwhile, here are three simple ways you can show friendly consideration of those who share your telephone line:

1. Keep all calls short.
2. Avoid interrupting when the line is in use.
3. Hang up your receiver carefully. One receiver off the hook can tie up a whole line.
