Crowds and Tuberculosis

By Courtesy Of
SMITH-BRADLEY DRUG CO.

The crowds of people who fill to overflowing busses, street cars, trains, factories and stores these days include many who will become carriers of tuberculosis germs, for those germs are "caught" and carried and often distributed to others before the distributors are even aware they had contracted the disease.

For a long period of time the germs may lodge unknown in your system, and undiscovered until a physician's examination reveals your bodily resistance had decreased to a point where the presence of the germs is discernable.

A physical check-up once or twice a year is a very sensible precaution. To neglect such a safeguard to health is to expose not only yourself but those with whom you come in contact, should you be the unconscious carrier of the germs.

When medicine to destroy germs is needed your doctor's prescription must be filled with drugs pure, fresh and of needed potency.

share, Mayor Edward F. Jeffries of Detroit notwithstanding.

Furthermore, none of these "children" possess the power to levy taxes. And the local governments — cities, counties and villages — do have this right. A. J. Phillips, executive secretary of the Michigan Educational association, has conceded that "any solution for the problem of school finances must come from local governments through raising their valuations or increasing their millage or both."

The schools' plight admittedly great, is a by-product in part of the gradual breakdown of local tax responsibility caused by adoption of the state sales tax and elimination of the state property tax.

Local governments look to Lansing increasingly for a solution of their financial problems. The state's own "children" — colleges, hospitals and others — have been crowded out for years in the pressure group scramble of local governments to get more money at Lansing.

• • • •

It is the conviction of Governor Kelly, whose courage in meeting the issue has elevated him in the esteem of many people, that if the state can't and doesn't look out for the interests of its own "children" when times are good and when there is money available in the Treasury, then it never will do so when times are bad and the treasury deficits prevail.

Building contractors and representatives of organized labor have assured legislators that the state's building program can be completed by September, 1947, and that adequate materials and labor can be obtained.

A product of the Catholic parochial schools and of the University of Notre Dame, Governor Kelly has become a leading exponent for public schools. This is unusual. It does emphasize the devotion of a man to what he considers to be his obligations as governor of Michigan. Not running for office, Kelly is outspoken. Veterans' needs are close to his heart.

• • • •

The outcome of the tug-of-war to see who is going to get $27,600,000 — the state's own "children" or those of local governments — is going to depend largely on the willingness of legislators to support the administrative program, as drafted by the house ways and means committee and the senate finance committee.

The Michigan Conference of Mayors has been telegraphing mayors of cities, large and small, to bring pressure on members of the house and senate at Lansing.

Rep. David E. Young of Saginaw, retiring president of the Michigan Association of Supervisors, is co-sponsor of a bill to divert one-sixth of the state sales tax to local governments — cities, villages and townships — all of whom have payrolls and numerous employees right in the legislators' home territory.

It's a real showdown, and the outcome is none too certain.

If the big-town mayors and supervisors succeed in raiding the state surplus now, it's a cinch that the state never will have such a favorable opportunity to help its own neglected children — the state-supported schools and hospitals which serve the entire people of Michigan and which have no taxing powers themselves.

Sliced Oranges

According to recent research, only one-third to one-half of the vitamin C in an orange is obtained when the juice alone is used. Even less is obtained if the juice is strained. An economical and healthful way to serve oranges is in segments or slices.

Blinds Save Heat

Glass is a natural heat conductor, but drawn window blinds cut heat's exit, since they create a dead air space. Two blinds are doubly efficient. Draperies, especially heavy ones, drawn across windows, are also almost as effective as storm windows.

Population Increases

In the last 50 years the population increase alone has been about as great as the total population of 565 millions in the world in 1650. This grew to 906 millions in 1800, to 1,676 millions in 1900 and to 2,171 millions in 1940

How
Edison Electric Customers
will get their
REFUNDS

Question. *Is it necessary to apply to The Detroit Edison Company for this refund?*

Answer. No. A complete record of all customers' bills is in our files.

Question. *Can I call The Detroit Edison Company and find out the amount of refund I will receive?*

Answer. Sorry, no. Because of the millions of records involved, it will be impossible to discuss individual accounts until *after* your refund check has been mailed.

Question. *Who is entitled to a refund?*

Answer. All electric customers including residential, farm, water heating, commercial, industrial, and municipal, who have received electric service from The Detroit Edison Company at any time between Jan. 1, 1944 and Dec. 31, 1945.

Question. *What should I do to insure my receiving my refund check?*

Answer. If you do not have our electric service in your own name now, or should move before June, 1946, be sure the Company has your correct forwarding address. Please leave this address at any customer office or mail your new address to The Detroit Edison Company, 2000 Second Avenue, Detroit 26, Michigan. Otherwise, there is nothing you need to do about it.

Question. *How much refund will I get?*

Answer. The exact percentage cannot be determined until the Trustee appointed by the Court has approved the details of the plan. As a general guide, your refund will be about equal to your *average* bill for two months' electric service, provided you have had service for the entire two-year period.

Question. *How is The Detroit Edison Company able to make this refund?*

Answer. This money comes from a fund set aside by the Edison Company and impounded by the Court. About six-sevenths of it would have been required to pay Federal Wartime Taxes. About one-seventh was taken from the Company's earnings during 1944 and 1945.

Question. *When will I receive this refund?*

Answer. Sometime before June, 1946. It requires individual processing of 12 million electric bills to issue more than 1,150,000 refund checks. The first refund checks will be issued about Feb. 5, 1946. They will then be mailed out at the rate of 11,000 a day.

Question. *If I have received service at more than one address during this period, will I receive one check covering all addresses?*

Answer. No. A separate check will be issued for each address at which you received service. These checks will be mailed at different times.

Question. *To what address will a refund check be mailed?*

Answer. Your refund check will be mailed to the address at which you are now receiving electric service.

Question. *Can my refund be credited to my current electric bill?*

Answer. No. All refund money is being paid by the Trustee. To apply the refund against your current bill would require a larger staff and additional bookkeeping which would increase the cost of making the refund.

Question. *What should I do if I do not receive my refund check by June, 1946?*

Answer. At that time stop at any of our customer offices or call The Detroit Edison Company, and ask for the "Refund Department." We will be glad to investigate your case and get the refund to you.
