Foxes in Michigan are going to have few secrets when investigations now underway are completed.

The conservation department has assigned a game division biologist, Donald F. Switzenberg, to the job of correlating a mass of information that has been gathered in recent months.

The department's trapper-instructors, conservation officers, members of sportsmen's organizations, and farmers have cooperated in furnishing reports covering numbers of foxes seen and evidence concerning their food habits.

Switzenberg returned to the department only recently after five years in the army.

FAIR PLAY OUR POLICY ON NEW CAR DELIVERIES!

IN COOPERATION with the Ford Motor Company, we are making every effort to give earliest possible delivery of new cars to our patrons, according to the fairest method we have been able to devise. •• During the current shortage, when there are not enough new cars for all who want them, we are filling orders for new cars on the basis of first come first served. There are two important exceptions to this rule:

1. We are definitely reserving a substantial percentage of our cars to supply those who have served in the armed forces. 31.2 percent of all Ford cars delivered to date in this area have gone to veterans. This we feel is simple justice and conforms with public interest and fair play.
2. If emergency need for a new car is a factor, we will, in the public interest determine priority according to the now abolished but publicly accepted OPA priority lists.

•• We believe these delivery policies are in your interest. We will use every care to see that the procedure works fairly and that exceptions to the rule of first orders delivered first are made only in genuinely deserving cases.

•• Both in the matter of increasing production and speeding delivery, the Ford Motor Company and we ourselves are making every effort to get your new car in your hands promptly and fairly. We want to assure you that the '46 Ford is out in front in everything and is well worth waiting for.
