WASHINGTON DIGEST
(Continued from Page Two)

ments are being recorded right now. I have reason to believe that when the question of installing these recorders in the White House was brought up, it was flatly turned down. White House employees have a long and excellent record for fidelity. Of course they are carefully screened, and when the campaign to get every body fingerprinted (an excellent idea if you have nothing to conceal about your past and no plans for an over-adventurous future) was begun, the White House employees voluntarily gave their thumbs, fingers and hands for the ink-pad.

WHEN THE PEOPLE VOTE, THEY WIN

The June "Economic Outlook," published by the Congress of Industrial Organizations, contains an article entitled "When the People Vote—They Win." That might be interpreted in more ways than one. The article points out that an "off year" is so designated politically not only because the president is not at stake, but because the politicians know that general apathy on the part of the voter has marked those elections in the past. 1938 (off) thirty million voters went to the polls; 1940 (on) fifty million voters; 1942 (off) twenty-eight million; 1944 (on) forty-eight million.

The CIO takes the attitude that what the people as a whole want is what they (the CIO) want, and that the people get what they want when they vote for it. They say: "Mass registration and mass voting is the best guarantee of liberal progressive government."

They might also add that if you want conservative rather than liberal progressive government, you have to vote for it, too. In any case you can't get what you want unless you go after it. The "Outlook" prints a table showing how the vote shifted in certain districts in off-years. The table showed that when the vote fell off, it was the Democratic vote. Districts which swung from Democratic to Republican candidates in most cases shifted with a decrease in the total vote. "The Republican vote remaining relatively stable, while the Democratic vote dropped sharply."

Does this prove that Democrats are sicker than Republicans, or that the Republican is a creature of habit?

FROM THE FARM-BELT CIVIC ASSOCIATION

The return cards for the picnic, specifying the number of members and friends who have circled the 28th of July, are pouring in. By the looks of these returns, it will be quite a day.

Let his remind you again that it is important for you to return these cards so that we may make our plans accordingly.

As your temporary columnist sits here writing these few words, he cannot help but hope for a day like today—a cloudless sky, not too hot, not too cool, capped with a gentle breeze.

All but a few last minute arrangements have been made. Come one, come all. I'm sure you'll find us prepared for you.

The business of the Association is progressing slowly, but surely. We find that the deeper we go into the affairs of our community the slower and harder become the digging, but to this date only a small minority have laid down their shovels. Incidentally, we could use more shovellers. Give us a ring.

Mr. Robert Tressler is taking a two weeks vacation up north. Hope he catches lots of fish.

Mr. Lyle McGlocklin and son, Bob, were away over last week-end visiting relatives.

Mrs. B. Baumann, our new neighbor at 8 Mile and Milburn, is suffering from a bad case of sunburn, acquired while boating in the garden on a hot day this week, while Mr. Baumann, being of a more delicate constitution, cooled his heels in the Teleview Theatre.

He thinks, though, he did his part in feeling sorry for her. So do we! the poor soul.

At the Board of Directors' meeting of Monday, July 22, due to numerous suggestions, one of the things decided, was to bond our Treasurer.

If there's anything to the old saying about carrying an umbrella to be assured of a beautiful day, we hope to see you at the picnic—with umbrellas.

P.O. Box 274. Phone 1421.

156,000 Telephones Installed in Michigan in 6 Months...

But 100,000 families are still waiting

Severe shortages of lead, copper and other materials which go into telephone equipment have upset our time-table for clearing up waiting lists.

Even so, during the first half of this year, Michigan Bell

- Installed new telephones at the fastest rate in its history—on average of 26,000 per month.
- But also received new orders at the fastest rate in its history—on average of 27,000 applications per month.
- Added 340,000 miles of wire and installed enough additional central office switching equipment to serve 50,000 new customers.
- Cleared waiting lists in 27 Michigan Bell exchanges.

As the second half of 1946 gets under way, there are still 100,000 families waiting for telephones. Of these, 49,000 have placed their orders since the first of the year.

We still have to expand our facilities in 200 exchanges to give service to everyone who has ordered a telephone.

We now hope that most of the orders for service received before January 1, 1946, can be filled by the end of the year. In some areas, of course, we expect to complete many orders received this year, but it may be late 1947 before we can return to a "ready-to-serve" basis everywhere.

Meanwhile, we are leading our present equipment far beyond its normal capacity, to shorten the wait for as many folks as possible. This may affect the quality of service for the time being. But normal service will return as we install the needed lines and equipment.

Waiting applicants can be certain that we are just as anxious as they are to see their orders filled at the earliest possible date.

★ Long Distance lines and switchboards serving Michigan resort areas are extra busy this summer. On calls to and from those areas, you'll get better service by avoiding the rush hours—10 A.M. to noon and 7 to 9 P.M. Keeping calls brief will help too.
