WASHINGTON DIGEST

(Continued from Page Two)

without taking a single note, long paragraphs of some speakers who forgot that the translator is waiting patiently to translate one segment before the speaker goes on to the next.

Prize of them is Pavlov, the lean and glibly looking young man who appears to wrap himself about Molotov or Vishinskiy and with his lips close to the speaker's ear pour the words so rapidly that it would appear they synchronize with the movement of the speaker's lips.

But even a perfect translation may produce a different meaning, for the same word may mean two different things in the same language to two different pairs of ears.

You may recall the famous Molotov outburst at the opening of the assembly, the speech with which the Russian delegate demanded disarmament, objected to the Baruch committee plan and went down the line wallowing everything in sight. As I remarked earlier, there was more smoke than fire in that tirade and American delegates have been suspecting as much, made the terse comment on the speech, "smart but tough."

When the translations came back from the report in the Russian press, Austin's words became "smart but sharp."

Now it may be that "tough" is a tougher word in Russian than it is in English, because the Russian ordinary conduct is such and some other matters, the way from dancing to breakfast on vodka, may be what we would consider tougher than the Anglo-Saxon approach.

AMERICANS CONSCIOUS OF FOREIGN POLICY

Most Americans do not realize how far this nation has gone in the establishment of a foreign policy built on popular desire. In the past, the foreign policy of the United States always has been a rather vague thing to the people in general, something evolved behind a screen of formal phrases in the ancient high-ceilinged offices of the old state department buildings, where they still have marble floors that really work in some of the rooms.

In the early days the subject was kept out of domestic politics simply because the politicians knew that the people knew as little as they did as to what it was all about and didn't care any more.

Now came the famous Wilson versus Lodge fight over the League of Nations, which was really something far deeper than that, a fight of two powerful personalities and two different concepts of government—not woe government but domestic government. Lodge and Wilson became, definitely committed to their own views but they couldn't afford to compromise.

After that, each party considered it fair game to rip the other up the back when it came to a discussion of foreign affairs and the line of tradition (which was really a negative thing) "foreign affairs end at the shoreline," was split wide open.

And then the bloody conflict of World War II made people realize that Democratic and Republican blood when it flowed on the battlefield was the same color and caused some gaping wounds at home.

The campaign which we have just witnessed, while it was characterized with the same old fog as of the past, omitted the question of foreign policy except when it was raised by persons already discredited by high major parties.

That is the hope, as I see it, for American dominion, for the dominance of the American idea of human freedom. We have learned that when it comes to facing the world we must shoulder to shoulder as Americans and nothing else.

Aircraft outlook is for about a thousand transport planes with a capacity of at least 35,000 seats, to be in scheduled operation by late 1948.

VETERANNEWS

From the OFFICE of VETERANS' AFFAIRS LANSING

MICHIGAN BONUS FOR WORLD WAR II VETERANS

"Hold everything!" This is the advice from the Michigan Office of Veterans' Affairs to veterans desiring to apply for the newly authorized state bonus.

The O.V.A. explains it this way: Before a bonus can be paid, the cash must be raised. Before that cash can be raised, bonds must be sold to the investing public. Before bonds can be sold, they have to be printed. Before they can be printed, the legislature must specifically authorize the State Treasurer to have this done. All of which adds up to the conclusion that it is going to be quite a while before Michigan World War II veterans will get the cash.

Veterans who had planned on spending their bonus money on Christmas presents better plan on waiting for a new Easter or Mother's Day, says the O.V.A. says. Or maybe to finance a vacation trip in the summer—and maybe late summer, at that.

Another thing, the Office of Veterans' Affairs explained, is the matter of handling the work involved. By the terms of the referendum, the legislature must designate the agency to do the job and must provide what will be a sizable appropriation for dozens of clerks, typists and other workers for the printing of three-quarters of a million application blanks, envelopes, postage and the like. If a special session were called now, it might complicate matters, Capitol observers say, since as much as \$1,500,000 may be needed for the administration alone, and, in view of the approval by the voters of the sales tax diversion measure, as large an appropriation as this must be reconciled with appropriations for other state activities and not hurriedly passed by a lame duck legislature. This probably means that no official action leading to the printing and sale of the bonds and the designation of an agency to do the work will take place before January, when the new legislature arrives in Lansing for its regular session.

"The money will be forthcoming sooner or later. Don't spend it now—just take it easy in the meantime," is the way the Office of Veterans' Affairs sums it up.

Freezing Rhubarb

Rhubarb can be preserved by quick freezing without sugar, sweetening being added as the rhubarb is made up into sauce or pie in the winter. Rhubarb preserved by freezing is said to be far superior to that preserved by the old practice of sealing it in water in fruit jars. For one thing, rhubarb should be cut into inch-long pieces, packed into any one of the available types of fruit or vegetable containers and frozen without the addition of sugar.
