• Why take any chances on not having all your equipment in good running order next season when you can have it all fixed up now. That's our business, expert repairs on any tractor, implement or tool used in farming. We have the mechanics, the special shop equipment and a big stock of genuine IH parts to do your work right.

The main thing is to give us a little advance notice when you can. Most of the time our shop is swamped but when we know ahead of time we can schedule your jobs and have your machine ready when you want them.

Just give us a ring. Then when you're coming in, on the next trip, load up your tractor or any other piece of equipment and drop it off here. You'll find our service as good as the McCormick-Deering machines we sell. Our prices are reasonable. And we guarantee your satisfaction.

**COUNTY BOY NAMED
STATE DELEGATE TO
NATIONAL 4-H MEET**

William Porritt, Oakland County 4-H Club member, has just been named as official state delegate to the National 4-H Club Congress in Chicago, Illinois, December 1st to 5th, according to Lyn Lewis, 4-H Club Agent.

Oakland County was able to accept the invitation to send this delegate because of the assistance provided by the Pontiac Kiwanis Club, which agreed to pay one-half of the delegate's expenses. The Oakland County 4-H Service Club has raised the other one-half of the expense.

William well deserves the William Porritt honor he has won, as his 4-H Club record will show. William has completed ten years of Dairy Club work, and ten years of Potato club work. He has been a member of the Dairy Judging Team four years, was selected County 4-H Club representative to Pontiac Kiwanis Club in 1945, and was named as one of the state winners in the Dairy Production Contest in 1945.

William was selected to become a member of the State 4-H Service Club at the Annual Club Service at Michigan State College in 1946 and was promptly elected president of the club.

William is the son of Mrs. William Porritt, Route 1, Pontiac.

The Michigan Delegation will go by train, leaving Saturday, November 30. Miss Mary Woodward, Oakland County Home Demonstration Agent, has been selected along with four other county extension workers to be in charge of the trip, and will accompany the delegates.

The Michigan Group will be housed at the Harrison Hotel in Chicago.

Early farrowing of spring pigs will return the hog producer a greater profit in 1947.

With normal marketing procedures returning, Harry Morley and Graydon Blank, extension animal husbandry specialists at Michigan State college, believe you should arrange for the spring pig crop early.

The specialists explain that under existing price regulations, the top price for market swine remained the same throughout most of the marketing season. With supply and demand again governing prices, the outlook indicates that the safest plan is to breed sows during November and early December. This will give early farrowing pigs.

Using electric pig brooders and carefully prepared farrowing houses, March and April farrowings are possible. These pigs can then make a maximum use of pasture and be ready for fattening by the time of the 1947 small grain harvest. With good management practices, they will be ready to sell on the market before heavy fall marketing begins.

On the average, slum when heavy fall marketing begins. If the market animals beat the big supply to market, they will bring higher prices.

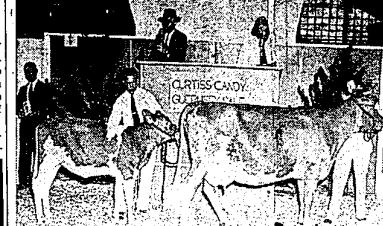

The selection of well-developed gilts from large litters, mated to quick maturing boars and a length of body, a wide loin and a deep ham and side, will result in better litter, the specialists claim.

Producers who cannot possibly arrange housing and equipment for early spring farrowing must exert particular attention to the feeding and management program to offset the lower prices usually received for pigs marketed late in the year.

CORN HARVEST

Corn harvest to set record, despite scattered areas of drought during the first two weeks that took a \$5,000,000 bushel bite out of prospective 1946 production, according to the agriculture department's crop reporting service.

Calf Brings Record Price at Guernsey Sale

CALF, Illinois, a Guernsey's record was broken at the Illinois State Fair, Curnell C. Curnell, Curnell Noble Deborah, was sold for \$10,800. Purchaser was Mrs. F. L. Weyenberg of Thiensville, Wis., and consignor was Miss Iris Candy Company.

**INTERNATIONAL
HAS BIG STOCK
ENTRY FROM STATE**

The nation's greatest livestock show — the International at Chicago — will have Michigan competition in many departments.

This was apparent when a list of Michigan entries in the big show was compiled by Michigan State college — Pontiac, at the Livestock Exposition shows from November 30 to December 7. During the past five war years no exposition.

Those who argue that the work horse is not longer of any value may look with surprise on the fact that Michigan is sending 49 draft horses to International competition.

Among other stock, grain and meat exhibits, the National Peanut Show, exhibited by Michigan State college. Fourteen different individuals are entering horses.

Eleven exhibitors from Michigan will show beef cattle and ten are listed to show swine in competition.

Entries from this area, as compiled by Michigan State college, include:

Belgian Horses — Meadow Brook Farm, Pontiac; Mater Crest Farms, Northville.

Aberdeen Angus Beef Cattle — Great Oaks Stock Farms, Rochester; Weidmann Farm, Lake Orion.

**Farmers Warned Not
To Store Soft Corn**

Although weather this fall in most parts of Michigan has been more favorable for preparing corn for storage, farmers should be certain they do not crib grain with excess moisture content.

Shelled corn should not be cribbed with more than 15 per cent moisture, crops specialists say.

Farmers should seek cooperation of local elevators to test the moisture content of their corn before storage.

Success in drying corn by force ventilation without heat has not proved too successful. Ventilators, however, may be installed in a crib to increase the air movement through the corn. These reduce the thickness of layers of corn through which the air has to move.

DARK FLOUR

Dark flour may be used for red purposes, the department of agriculture is said to be studying proposals to purchase remaining mill stocks of dark flour for meaty exports of countries accustomed to darker bread. Mills reported that bakers and distributors are cancelling orders for the darker flour, now that the mills are free to grind normal white flour.
