PARTIES PLANNED FOR TWO NIGHTS AT BOND SCHOOL

Admission includes the playing of games and refreshments. Tickets may be obtained at the door, from any member of the club, or by calling Mrs. W. Mathews at Farmington 6542-33. Merchants of the community have been most generous in contributing donations for the party and over eighty fine prizes will be awarded, as well as cash contributions which were made to help defray expenses. All proceeds will be used to purchase a moving picture projector for Bond School.

Forest Safety
Foresters say hand tools, axes, particularly, cause the greatest number of wood's accidents. It's always a good idea to stand off at a safe distance away from any tree being cut. Also stay clear of fellow-workers when slicing the axe or toting a sharp saw. Be careful in handling tools that have a nasty tendency to bounce or glance off the tree you're working on.

Jap Fertilism
Nearly 600 years ago Japan, cut off from the world at large, had developed a military fertilism of warrior lords and peasant-serfs which closely resembled Europe's. In the late 1600s European traders and artists penetrated Japan's shell, were later expelled. By 1816 foreign influence was wiped out, and Japan withdrew into a shell of isolationism for almost 250 years.

Vegetable Seed
U. S. growers raised 261,214 acres of vegetables in 1945. Commercial seed production, and they harvested 238,000,000 pounds of seed. The 1946 plantings are about 218,423 acres.

Painted Woodwork
Waiting painted woodwork will protect the surface from dirt and make it easier to clean.
