GETTING THE JOB DONE IN FARMINGTON

For many months people have been waiting for telephones in this community, because we could not obtain the wire and cable we needed to link their homes with the central office.

Although shortages of copper and lead have curtailed production, we're glad to report that some materials are arriving. So, construction crews are busy expanding the local telephone system. As the work moves along more families will be getting telephones.

Meanwhile, in order to give service to as many waiting applicants as possible, we've loaded our present equipment to the limit.

If you are waiting for a telephone, you can be sure your order will be filled just as soon as possible.
