The spuria iris Is among the finest for cutting. The flowers are much like the English iris, but somewhat larger. They should be, grown in the more moist part of the garden. They require abundant moisture to do well, but should not be planted in wafer logged soil. Another excellent cut flower is tris chroneuca, and its varieties. This does well in shallow water or in damp locations. Invitation Extended To Box Social

The public is cordially invited to attend a box social to be given by Pup Tent 46 of the Military Order of Cooties, to be held Saturday evening, March 15, at 8:00 p.m. at the Legion Home on Grand River

nually in the United States are used in the manufacture of shoes.

Potato Spraying Tests Show Need For DDT Mix

Reports of the 1946 potato spraying and dusting experiments at the

| Section | Sect

ials tested.

From the results of the tests, the following recommendations can be made for potato disease and insect control.

made for potato disease and insect control.
For spraying — one and one half
pounds of 50 percent wottable DDT
combined with \$4-100 borgeaux
mixture spray. The bordeaux mixture is composed of 5 pounds of
copper subhase (blud 'strict), 8
pounds of the strict of the strict of
pounds of water.
For dusting — 3 percent DDT in
a 7 per cent copper dust.
Frequency of application varies
with weather conditions and insect infestations, but the 1946 test
results show that applications gwery.
I days or of tener are advisable.

10 days or oftener are advisable.

Jap Farm Land
Of 150,000 square miles of land in
Japan only some 18 per cent is are
ble, an area less than one-half that
of the farm acreage of Illinois.
