LABOR SAVING BARN AND ELEVATOR BEING EXHIBITED

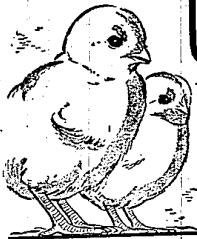

This miniature labor-saving barn and elevator, now on display in the county agricultural agent's office, 15½ West Huron St., Pontiac, may give many farmers ideas on how they can remodel to save time and steps. Karl D. Bailey, county agricultural agent, invites farmers to see the actual working model. The picture shows E. K. Hancock, Shawanssee county agricultural agent, and Albert Festerling, emergency farm labor assistant in Bay County. They cooperated in building the 40 models distributed by Michigan State college and display in county extension offices throughout Michigan.

A sliding or hinged door in the side or bottom of a trailer box saves work when shoveling grain from a truck.

for high  
livability feed

**Kellogg's  
CHICK STARTER**

Your baby chicks will have a lot better chance of living and growing into big, husky pullets if they get the right kind of feed. Start 'em on Kellogg's Chick Starter. Then you can be sure that they're getting the nutrients they need. For livability, for growth, for results, feed Kellogg's Chick Starter.

**Dairy Meeting  
Set For March 25**

A Dairy Herd Health Meeting will be held at the Wilcox Community Hall, Monday, March 24, at 2:00 p.m.

The meeting sponsored by the Oakland County Extension Service Dairy Planning Committee will be chaired by Kenneth Rocker of Wilcox.

The program, designed to give farmers information about the control and prevention of Bangs and Mastitis diseases, will feature local veterinarians and members of the Extension service in discussions about the diseases.

Part of the program will be exhibits and displays of pictures and a Mastitis infected udder. Of interest to farmers will be a question box, which will be used for discussion. All interested farmers are invited to come and bring a neighbor.

**Evergreen Seedlings  
Available Through M.S.C.**

Michigan farmers who have been wanting to plant evergreens on their farms, will be glad to know that the department of forestry at Michigan State college is offering evergreen seedlings this year.

The seedlings are offered for reforestation, Christmas tree plantings, windbreaks, restocking woodlands, erosion control, and wildlife food and cover.

P. W. Robbins, forester at Michigan State college, says that farmers should study their planting sites. Soils, multiple conditions, and grass or brush cover are particularly important. Planting a mixture of species is generally preferred to pure plantings. The MSC department of forestry or your county agricultural agent can give information on what and how to plant.

Three-year-old red pine seedlings are available at \$4 per 1,000 and 2-year-old jack pine seedlings are offered at \$2 per 500. These seedlings are offered only in these amounts, and no more than 1000 red pine and 500 jack pine can be sold to a customer.

The seedlings are shipped F.O.B. from either East Lansing or Wellston nurseries, whichever is nearer, unless the purchaser directs otherwise. Checks or money orders should be made payable to the department of forestry, Michigan State college.

Cows and hens have not slowed down production. Milk production per cow on February 1 was the highest on record for that date. U. S. hens laid 4,500,000,000 eggs in January.

Drilling around the fields saves more time than drilling back and forth. Corn, beans and other row crops can be planted and cultivated around the field, too.

*Get More Dividends  
from  
YOUR HERD  
with a modern  
**McCORMICK-DEERING  
Cream Separator***

You can make your herd pay more cash dividends with a modern, efficient cream separator. It's just like adding an extra cow to your herd—and extra cash to your farm income.

McCormick-Deering Cream Separators are modern, efficient units designed to skim clean. They are easy-turning and operate smoothly. The parts touched by milk are made of shining, easy-to-clean stainless steel.

They are available now in hand-operated, direct electric drive or in belt power drive models. See us for complete information.

**It seems like yesterday**

It seems like yesterday that Nancy was playing with dolls. Now she's pushing her own baby carriage. Yes, there's been a lot of changes in the last 20 years—most of them so gradual we hardly notice them at all.

Nancy didn't grow up all at once. A tooth at a time—a curl at a time—an inch at a time—and suddenly a little kid sister was Mrs. Joe Jones, mother of Joe, Jr.

Like Nancy, the use of electricity has grown a lot in the last 20 years. But the price of electricity has been going down steadily. You may not have noticed it because your bill probably stays about the same—but how many appliances have you added to your home since '27? Now, you are getting nearly twice as much electricity for your money as you did then.
