in each grade will have a room use each teacher will have one grale only. The tentative arrangement to date is as follows: Angling Road, John Grace, Lathrup and Southfield schools will have grades kindor-garten through 6. East Southfield school will have grades so through 6. Magnolla school will have grade se kindergarten through three. Trace school will have grades kindergarten through eight. dergarten through eight. Brooks school will have grades seven and eight. McKindey school will have grades kindergarten. seven and eight.

grades kindergarten, seven and cight.

A report has been circulated that grades seven and eight from Lathrup School will attend Royal Oak Junior High School this year. In accordance with present tentative plans, these grades will be accommodated in the local school system. All children entering kindergarten should be taken to the family physician, before the opening of school for a health check-up and immunization "shot" given as recommeded by the physican sea recommedical by the physican sea of the check-up. These records will become a part of the child's permanent school record. The birth certificate will be returned to the paracel.

To enter kindergarten a child must be five years of acc before

To enter kindergarten a child must be five years of age before November 1, 1947.

November 1, 1947.

To eliminate the use of basement rooms at Magnolia and Southfield Schools, and to eliminate half day sessions as far as possible, rooms at East Southfield, McKinley, and Brace Schools, not recently used

Corn Crop Is Big 'Eater' of Nitrogen, Ohio Study Reveals

Ohio Study Reveals

CORN'S need for liberal quantities high yields was indicated by recent resourch work by Drs. J. D. Sayre and R. E. Yeder, agronomism Statuton, which showed that under average conditions, corn plants must take up nearly 1½ pounds of nitrogen from the soil for each bushel of grain produced.

While most soil for each bushel of grain produced.

While most soil for each bushel of grain produced.

While most off which grain must rade on the soil for each bushel of grain produced.

I while most off which grain continues and increasing cart of the nitrogen required for the corn crop, they are to an increasing cathen using extra quantities of nitrogen fertilizers to supplement regular row fertilization of corn on fields where the fluttune of the corn of fluttune of the fluttune of the corn of fluttune of the flu

DEAD RIGHT!

"I was going into that intersection first. I had the right of way—that truck driver should have stopped when he saw me—I was right,

"Yes dear — you always were right — the other fellow always wrong. That's why we're here."

You know the kind, you've met him on the road—and ducked. He always barges through traffic when it's a question of split-second judgment. Never anticipates other drivers' actions—just assumes that traffic will give way. Owns the road, Drives with his horn,

He may get away with it for a time, plus a few tickets, because other drivers are more careful, more conscientious. But his kind eventually steps on the gas once too often—and for the last time he is "right—dead right!"

4,000 people died last year because "know-it-all" drivers violated rules of the road and the courtesies of driving. Good drivers never need to hold cemetery post-mortems. They drive carefully and live longer.
