METHODIST CHURCH WOMEN'S GROUPS PLAN MEETING

The Sunshine Harmony Circle, the Golden Rule Circle, and the Woman's Society of Christian Service of the Farmington Methodist Church will hold a joint meeting on Thursday, November 13, at the home of Miss Merab Andrews, 3239 Shawassaw. A cooperative luncheon will be served at 12:30 p.m. and all those attending are requested to bring their own table service, and one passing dish. The regular meeting of the Sunshine Harmony Circle, scheduled for the first Thursday in November, will not be held, but all members are urged to be present on November 13.

Know Your Pans To Help Avoid Waste

If your cakes, biscuits or other baked goods don't turn out right, perhaps it is your baking pans, not recipes, that are at fault. Recipes baked in the same oven for the same length of time and at the same temperature may brown differently in different pans.

The regular meeting of the Sunshine Harmony Circle, scheduled for the first Thursday in November, will not be held, but all members are urged to be present on November 13.

If you don't use aluminum pans you may need to change the baking time and the temperature accordingly. In general, enameled baking pans give the deepest brown. Glass racks next in rapid browning, especially in an electric oven. Enamelware and glass both absorb that kind of heat well. In aluminum and tin the browning is less rapid and usually more even, unless the tin is very dark, or thin and warped so that the heat is uneven.

The shape of the pan also influences browning. Cake baked in a square pan, especially if it is enamelware, is likely to become too brown at the corners. Browning is more even in pans with rounded corners. In a deep, high-sided pan biscuits and cookies often come out too pale because the high sides "shade" them from the heat. They brown better on a flat sheet or on the bottom of an inverted pan.

Pan size counts, too, in browning. If the pan is too large for the recipe, a cake or bread mixture may be spread too thin and become too brown. In these days of grain saving, we can't afford to throw away baked goods that have become too brown or didn't get "done".

Shell for Eggs
 The quantity of calcium required to put the shells on eggs in the United States during one year would fill 8,500 freight cars.

SPECIAL MATINEE WILL FEATURE DICKENS' CLASSIC

A special matinee will be held at the Civic Theatre on Wednesday, November 5, at 2:00 p.m., to give everyone the opportunity to see "Great Expectations", a filming of Charles Dickens' famous novel.

Some idea of the value of this picture may be gathered from the rating it has received: "Audience Classification, General; Legion of Decency Rating, Class A-1; unobjectionable for anyone. And here is what they say: Box Office Magazine, Good; Harrison Reports, Very Good; Film Daily, Very Good; Parents Magazine, Very Good; Hollywood Reporter, Very Good and New York Daily News, Very Good.

A faithful screen adaptation of the Charles Dickens' classic which captures all of the flavor and much of the warmth and charm of the literary original. It is a well acted, superbly photographed period piece. It will bring back fond memories of Pip's adventures, and should be doubly interesting to students and readers of Dickens' works.

John Mills gives a sensitive performance as the grown-up Pip. Anthony Wagner is a remarkable child actor and the cast contains numerous sterling character actors—John Mills, Valerie Hobson, Francis L. Sullivan, Bernard Miles, Marita Hunt, Finlay Currie, Jean Simmons and Anthony Wagner.

The special matinee is planned so everyone may see this truly great screen presentation. Old or young, it is a picture that no one should fail to see.
