VENOM OF BEES AND WASPS
It is not generally known that the "venom" of bees and wasps is not the same. The effect of a bee sting upon humans is definitely toxic, setting upon the heart and circulation, and although believed to be a cure for rheumatic disorders may cause the death of the person stung. A wasp sting, on the other hand, has no ill effect other than a local swelling and pain about the place of puncture. Wasp "venom" is formic acid, but what definitely constitutes the venom of the bee has yet to be discovered.

First Bookkeepers
World's first bookkeepers in ancient Egypt were undertakers who sold copies of "The Book of the Dead," which were placed inside mummy cases. These books were of parchment with sheepskin covers.

Double-Action Turnip
The turnip is really a double-action vegetable. Its roots make good winter food and the greens are excellent. After winter storage, turnip roots often are replanted in the spring and produce a new crop of greens which are believed to have a beneficial "spring tonic" effect. Unknown to many, raw turnips are excellent in uncooked salads. All turnips are a good source of vitamin B-1, C and G. Yellow turnips are especially rich in vitamin A.

Cobras Receive Flowers
Food and flowers are submitted as religious offerings to carved representations of cobras in many parts of India.

Gee! A telephone!

Not so many years ago, a telephone was still a curiosity. Few people had them. There was only a limited number of other telephones you could call.

But through the years, as more and more telephones have been installed, you've been able to reach more and more people... your telephone has been able to run more and more errands for you. Now, with still greater numbers of telephones being added, to take care of people waiting for service, its value is growing every day.
