Kids Are Important . . .

whether they are yours or your neighbors, whether they're in kindergarten or the 11th grade. They are the future.

Farmington, like most other communities, is faced with a serious school housing problem. Most of is are well aware of the facts. We have heard and read of crowded classrooms, possible half day sessions, use of basement rooms and auxiliary buildings. In fact we have probably heard so much of it that we are tired. we are tired.

we are tired.

1 But can we afford to be tired? Today, probably more than ever before, we must do more than just live. We must grow, develop and build a strong future. That future depends on intelligent, appreciative, opportunity-wise young men and women.

portunity-wise young men and women.

Farmington is about to hold an opportunity election. Qualified electors of the Farmington Township School District are going to be given an opportunity to vote. This in itself is a rare opportunity in the world today. But more important, you are going to be given an opportunity to give Farmington boys and girls an opportunity. Good school buildings throughout the Farmington District are urgently needed if your children are to get the kind of educational opportunity they deserve. You can give them that chance. They don't have it now, in basement rooms, in auxiliary buildings, in classrooms of 40 children and up. We don't say it will make better citizens out of one and all, or automatically increase their knowledge. But it will give them greater opportunity. knowledge. But it will give them greater opportunity

knowledge. But it will give them greater opportunity.

Farmington is growing both in size and stature. Its schools must keep up with the pace. Good schools are not only a valuable asset to the attractiveness of the community, they reflect the progressive spirit of the community. It is one thing the community can build, develop and be proud of. It is up to Farmington—no one else can do the job.

Our future is nour schools. To invest in better.

Our future is in our schools. To invest in better facilities, better buildings, better opportunities, is to invest in the future of our community. It's our responsibility!

To The Point . . .

is the way Americans like things. Over 100 Farmington citizens got some straight to-the-point facts from Congressman George A. Dondero last week. They liked it.

week. They liked it.

He made one statement, presented one challenge that every sincere thinking American must consider if he or she is to fight for the preservation of our democracy. Dondero stated: "There can be no compromise with Communism." In other words, Communism is red, Democracy is white. The two can not be mixed

Communism versus American Democracy is noth Communism versus American Democracy is notating new to any of us. But it is no less important within international affairs. Communism is here! It is a threat to democracy. Its form, its methods, its very being, is counter to our way of life. Democracy is based on Christian beliefs and religious ideals. In Russia, under Communism, the State is God. We believe in individual ownership, initiative and enterprise. Communists believe in state ownership. There it begins and enterit begins and ends.

it begins and ends.

Dondero presented a challenge, a purpose for every American to follow. He called on every sincere thinking American to make an appraisal of the American way of life. He called for a rebirth of democratic ideals as a weapon against the threat of communism.

ideals as a weapon against the threat of communism.

He called on every man, woman and child to take stock of his democracy. What other nation has what America has? What other country has as high a standard of living, enjoys such freedoms, has progressed as much or has such opportunities? Yet there are some among us who would scrap it all for what? America has grown, prospered, become the envy of every nation, because it is a democracy, a government the people built.

It is the people who must maintain it and strengthen it. This is our challenge — this is our answer to communism. Democracy works — proof is in our America and we are going to keep it American.

Former Minnesota Governor Is Playing Lone Wolf Role

I suppose I have had 50 people ask me about Harold Stassen. "Why hasn't Stassen a chance?" they query.

Most observers seem to agree

Most observers seem to agree that if he has a chance, it's a pretty slim one to date. The reason is always the same: The professional politicians don't want him.

Not because he's a political "unknown". He could hardly be called that. Sure, he took the job of county chairman at 21. He was elected governor of Minnesotal three times, could have been senator from that state, had he wanted the job.

In his case, it's not so much that

to make it so. That's part of the

tor from that state, had he wanted the job.

In his case, it's not so much that he's a newcomer as it is the way he came up. That way is characteristic of his whole campaign, and two words describe it: 'Lone Wolf".

The situation favored Stassen when he forced his way into the guiternatorial race in 1938. Minnesota was in a bad way. There was vandallam and corruption, and the Farmer-Labor sparty, which had held a stiff grip on the state, was disintegrating through its own weakness and graft. Stassen entered the race against the whiches of the Republican Old Guard, but he eventually forced them to help him to some degree. It was largely his own efforts, however,

Threatened Future Wars Must Be Stopped . . . Before They Start

It is fitting and proper that we should observe November 11th as the 29th anniversary of the great day that ended World War I. But we cannot afford to forget that 23 years after the first Armistice Day we were fighting World War II.

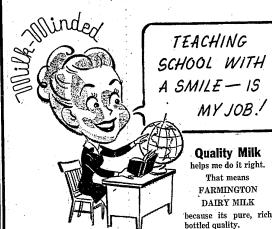

The importance of Armistice Day to us now is as rallying date for our efforts to stop all wars

before they start. For the sake of future generations, for the survival of civilization itself, this must be done.
