Captain Bergh, a veteran seaman of Norwegian descent, was proud of the boat's radar. In a magic circle a revolving beam illuminated anything two feet above the surface of the water — land or boats. Then the radar seven of the operation of the control o

higan.

Startling Facts
The human eye is seven times
more sensitive to green than to
red light. Industry uses four-fifths
of all the disproads mined. "Only
life" means the way animals small
them wet. The biggest Russian automobile plant in Moscow produces
one car a day. An American plant
produces one car a minute.

Varnish Detects Overloading
One of the newest ways of seeing
how loads distribute themselves
through objects and where there is
the greatest load and most danger
of breakage is by means of a sori
of varnish on the outside of the
test pieces. When there is snough
load on the surface the coating
cracks, glways at right angles to
