New telephone rates for Michigan Bell customers

THE Michigan Public Service Commission has authorized increased rates for Michigan Bell telephone service. New basic monthly rates are effective October 16, 1948. New charges for certain long distance calls between points in Michigan are effective October 20, 1948. This is the first general increase in 22 years. Michigan Bell requested the increase more than a year ago because of sharply increased costs of providing telephone service.

BASIC MONTHLY RATES

Basic monthly telephone rates for practically all es of service have been revised, effective Oct 16. New basic rates for your community will be listed in a folder enclosed with the first telephone bill you receive under the new rates.

The rate increase will produce 8% more revenue for Michigan Bell. However, the increase in some exchanges will be higher than average—in some, lower than average—in order to establish the same rates for communities in the Detroit district exchange having comparable number of telephones. Your basic rate a comparable number of telephones. Four basic fate will be determined by the number of telephones you are able to call in your local calling area.

These uniform rates mean that you will pay the let exchange with comparable local calling areas.

LONG DISTANCE CALLS WITHIN MICHIGAN

The following changes, effective October 20, apply to long distance calls between points in Michigan: The initial period is changed from 5 to 4 minute

on 15¢ station calls, and from 5 to 3 minutes on 20¢ and 25¢ station calls.

Overtime rates per minute on calls costing 20¢ or more are changed from ½ to ⅓ of initialperiod rate.

Night and Sunday rates are increased 5¢ on calls between points 48 to 112 miles apart.

TO PROTECT THE QUALITY OF SERVICE ANOTHER INCREASE IS NEEDED

To meet the unprecedented demand for telephone service following the war, Michigan Bell had to tackle the greatest improvement program in its history. So far, \$150,000,000 have gone into new and improved facilities-and the program is only half finished! Many more millions will have to come from investors before we will be equipped to give every one the kind of telephone service he wants and needs, whenever and wherever he wants it. Investors will continue to provide that money only if they are assured a fair return.

But our operating costs have continued to rise since we asked for a rate increase a year ago. Looking shead, even with the new rates, our revenues will . not be enough to pay day-by-day operating expenses and still leave enough to pay a fair return to investors. On top of that, we have made a wage offer to the telephone unions that would add substantially to

All of which means we must have more revenue So we have no alternative except to ask for another rate increase. But you can be sure that it will be no more than necessary to operate the business and to provide a return that will attract the capital needed to continue our improvement and expansion program.
