AN ADVERTISEMENT TO BUSINESS PEOPLE

What's $\mathbf{Y}_{\mathbf{our}}$ Attraculation?

ARE YOU GETTING YOUR MONEY'S WORTH?

ATTRACULATION is a word we've coined strictly for our own purposes. To us it is a combination of attraction and circulation ... or, the efficiency of your advertising. "Attraculation" to us, represents the impact of your message and the potential buyers who actually respond to your message.

Sure, you may be spending some money for advertising, but are you getting your money's worth? Getting value received is greatly dependent upon the number of people you reach with your message. So before you buy advertising of any kind find out first theore of the advertising problem. You may be misleading yourself into thinking that all that's necessary in advertising is to spend the money. Actually, many of your expenditures may be donations and not advertising at all. Let's keep them separate and spend enough for advertising... GOOD ADVERTISING THAT PRODUCES RESULTS... to realize the return you'd expect on any business investment. pect on any business investment.

You don't buy merchandise or material to stock your store while blindfolded . . . so don't put on your blinkers when an advertising proposition is being presented. Ask about results, be sure you have at least an even chance to get something besides doubtful goodwill to put in your cash register.

In The Audited Circulation Enterprise You KNOW, Definitely and Without Any Doubt, How Many People Your Message Reaches Every Week
