NOTICE

to Business Men:

It has come to our attention that, in certain Michigan Bell exchanges, advertising is being sold which is to appear on a "false cover" for telephone directories.

In that connection, we would like to call attention to the following provision of our tariff in file with the Michigan Public Service Commission:

"Directories regularly furnished to customers are the property of the Telephone Company and are loaned to customers; they are to be returned to the Telephone Company on request. No binder, holder or auxiliary cover of an advertising nature, except such as may be provided by or with the consent of the Telephone Company, shall be used in connection with any directory furnished by the Telephone Company."

In order to render good telephone service, it is necessary that we retain full control over our directories, which are an essential part of telephone service. We consider the above tariff to be a statement of a sound and necessary business policy and one which must be enforced.

Legal action has been taken to enjoin two persons who have sold advertising on and distributed such "false covers" for telephone directories.
