### MINNOW TIP

When bait minnows die on the hook soon after they have been put into the water, it may be that they are being fished in a zone deficient in oxygen at this season of the year. Such a zone is likely to be without game fish, and the angler may have better luck in shallower, better aerated water, or in the case of a few spring-fed lakes, deeper, better aerated water.

Lake Superior is the largest lake in North America.
