## Editorial

The Industrial Arts Program is whipping itself into fine shape. Work the second semester should prove to be very interesting and beneficial to the boys as well as the girls. The students will have a five week exchange in shop and homemaking.

We wish to extend our appreciation to the Smith-Tupper Lumber Company for the lumber they have been supplying the Industrial Arts class. Without this wood the industrial arts class would not be able to carry on such an extensive program in its woodworking unit. Because of their kindness it can carry on a more comprehensive program from the standpoint of projects made in this unit.

The Industrial Arts class also wishes to thank Mr. Lawanson of our Board of Education for supplying it with aluminum which it is using in its metal working unit.
