

Milford Farmer Finds Solution For Cattle Foot Rot

How Frank Ruggles, Milford, solves the foot rot treating problem in his dairy herd is cited in the February Capper's Farmer. Ruggles has a foot box of heavy oak lumber, says the nationally-circulated farm magazine. He fills the box with a solution of water and copper sulphate, then ties cows so they have to stand in it.

Michigan Mirror

(Continued From Page Two)

A Lansing man says he lost his job because of his religious beliefs. Lee Pruitt, 41, lathe operator for a tool and die company, said he refused to join the union, believing all men "should come to brotherhood without organizing or being affiliated with any natural force to which they must pay dues." He said he offered to contribute an amount equal to the union dues to any charitable organization, but was refused.

The U. S. Chamber of Commerce figures it will cost every Michigan family another \$248 in tax or federal debt burden if current spending plans are approved by congress. Total figure for the state: \$408,000,000 more.

Rep. William W. Blackney, Flint, still hasn't revealed his intentions. He may retire from congress. The 67-year-old legislator has been deluged with suggestions both ways.

Dr. Lee M. Thurston, superintendent of public instruction, has asked the legislature for \$15,000 to conduct an engineering survey of the possibilities of setting up a statewide educational TV network. Michigan colleges are willing to assist with the survey.

Average life expectancy in Michigan has jumped from 49 years to 68 years in the last half-century. And it is expected to keep on rising. In 1950 seven out of every 100 residents were over 65. In 1900 it was five out of 100.

Chester Kicinski Gets Marine PFC Rating

Marine Private First Class Chester Kicinski, 18, son of Mr. and Mrs. Thomas Kicinski, 25520 Orchard Lake Road, was promoted to his present rank when he was graduated from "Boot Camp" on January 9, Marine Corps authorities report.

Kicinski climaxed his recruit training by winning the marksmanship medal on the rifle range when he fired a score of 268 out of a possible 280 during his weapons training.

During the past eight weeks of recruit training, as a result of field experience and classroom lectures, the new Marine has become well versed in such military subjects as precision drill, first aid, hygiene, and field tactics. In addition to firing the famed Garand rifle for qualification, Kicinski fired other infantry weapons such as the .45 caliber pistol, carbine and Browning automatic rifle. He also witnessed demonstration firing of the machine gun, mortar and flame thrower.

Kicinski enlisted in the Marine Corps on November 5, 1951.

PUDVAN, WOODCOX UNDERGO MARINE BOOT CAMP TRAINING

David E. Pudvan, son of Mrs. R. M. Campbell of 23210 West Seven Mile Road, and Lloyd A. Woodcox, son of Mr. Vernon F. Woodcox of 18900 Dearing Street, are now undergoing training at the Marine Corps Recruit Depot, San Diego, California. Marine authorities report.

Pudvan, 21, and Woodcox, 20, were both former students at Clarenceville High School and were inducted into the Marine Corps at Detroit recently.

During the eight-week "Boot Camp", as recruit training is commonly called, Privates Woodcox and Pudvan will become well versed in such basic military subjects as precision drill, first aid, Marine Corps history and mission and field tactics.

Three weeks of the training period is spent at the Camp Matthews Rifle Range, situated 15 miles north of San Diego. While there, the men will fire the .30 calibre Garand rifle, .45 calibre pistol, carbine and the latest type bazooka.

They will also receive indoctrination firing with the light and heavy machine guns, 60 and 81 mortars, flame throwers, and the latest type bazooka. Under a newly adopted training program they will also receive instructions in throwing live hand grenades.

Woodcox was employed by the Evans Products Company in Plymouth before reporting for service while Pudvan was employed with the Ace Bue Supply Company.

Upon completion of recruit training the men will be given a 10-day leave and if they maintained a good record, will be promoted to Private First Class. They will be assigned to a Marine post or station for duty or to a Marine Corps school for advanced training.

Michigan's first paper mill was built in the Raisin River Valley in 1834. Now 65 mills in 29 Michigan communities produce over 12 million pounds of paper products daily.

Install New Novi Amvet Auxiliary Officers

A state of how officers headed by Betty Trickey were installed when Perry Kenner Post 76 Amvet Auxiliary, Novi, met at the home of Mrs. Charles Trickey Thursday, January 17.

Dorcas Suga, Regional Director, assisted by Reatha Houck, State Chaplain, installed the 1952 post heads.

Taking office with President Betty Trickey are Senior Vice-president Irene Wendland; Junior Vice-president Lulu Whittington; Secretary Audrey Orthwine, Treasurer Dorothy MacDermald, Chaplain Laura Baker, Historian Nellie Rackov, Sergeant-at-Arms Arline Rippen, Liaison officer Betty Sutton and Parliamentarian Loretta Bell.

Pat Kozak is the outgoing president. Mae Custer became a new member.

Award MSC Scholarship To Farmington Student

Stanley C. Bailey, Farmington senior at Michigan State College, has been awarded a \$100 scholarship by the Society of Engineers' Wives of Detroit. He is a civil engineering major.

Each year the society gives several scholarships to outstanding students attending accredited engineering colleges throughout the United States.

In addition to scholarship, the awards are based on campus citizenship, activities and financial need.

"Out of thin air"
comes the

HIGHEST HORSEPOWER
in Buick history

**NOTE FROM YOUR BUICK DEALER:**

Presented here is the story of a great new engine development, as told by the men who did the job. We reprint the story here in its entirety—as we couldn't beat it, if we tried.

No, we didn't have to build a new engine to do it.

We took Buick's valve-in-head Fireball Engine—which makes the most of high compression. We drew on 12 patent years of Buick carburetion research.

And we came up with more might, more miles, from gas—right out of thin air, in more ways than one.

When you talk about "miles per gallon" you think of fuel. That's what you buy. But air's free—and for every gallon of gasoline, a busy engine can gulp more than 8,000 gallons of air.

The problem is to deliver air in the right proportions, throughout the full range of speeds at which you drive.

A carburetor—big enough to supply the air needed at full throttle—can be wasteful in stop-and-go driving.

A carburetor sized for thrift in city traffic literally smothers your engine when you really give it the gun.

So Buick engineers came up with the Airpower carburetor—a four-barrel automatic—and here's how it works.

Loafing along, two barrels are working, two stay closed. And you get a low-speed thrift and smoothness that's out of this world.

As you pick up speed, the "stand-bys" smoothly come into play—feeding not just more gas, but more air too—which means that you keep on getting maximum power from each drop of fuel.

You have 170 effortless horsepower when you need it—a tremendous reserve ready to go into instant action at the nudge of your toe.

You have the satisfaction of knowing that you get this power with a frugal use

of gas. At 40 you use less gas than you formerly used at 30.

That's the story of Airpower carburetion in factory facts and figures.

But statistics can't tell you the breathtaking joy of heading for new horizons in a great-powered new ROADMASTER. Better come in soon. Lots of other folks are flocking into our showroom these days to see the greatest array of new Buicks we've had in years.

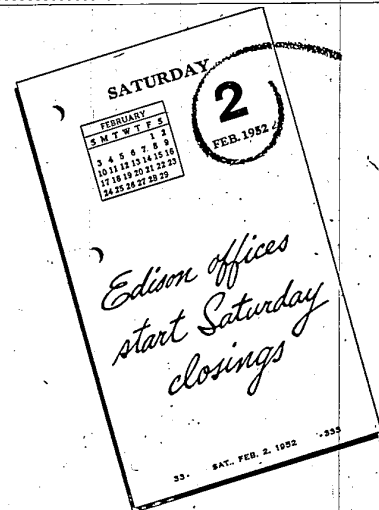

Equipment, accessories, trim and models are subject to change without notice.

Sure is true for '52

When better automobiles
