#### NEWS AND A Grass And Legume Crops Hold Key NEWBORN CALVES NEED EXTRA CARE

FOR GOOD START Newborn calves, like any babies, need extra special care, say Mi-chigan State College dairymen, they ofter farmers some tips based on observation of the MSC dairy on observation of the MSC dairy berd.
Colostrium milk is real medicine for nowborn caives, Dr. C. F. Huffman, dairy researcher at MSC, says this first milk contains many health factors that help to guard the call. It is shoudn't be wasted.
The nipple pail has done much to reduce call diesetive troubles by forcing the call to driak slowly into the true something the milk in small sips goes down into the true something the milk in small sips goes down into the true something the milk in small sips goes down into the true something the milk in small sips goes down into the true something the milk in the true true state of the milk, the dairymen sugrest. Give it ten per cent of its body weight or less daily. Too much milk upsets the call's its macheria if the call they in the general barn where the call with rumen bacteria if the call lives in the general barn where casily. If the call it is raised apart from the herd, if should be hovered.

it will pick up the healthy bacteria easily. If the calf is raised apart-from the herd, it should be provid-ed with hay that cows have nuzzled over. Such hay is annointed with good bacteria that may have come up from the cow's rumen.

Spring Forest Fires Dwindle In State

Further "green-up" of vegeta-tion and some rain have slowed the spring forest fire pace, with conservation department firemen holding 51 fires to 279 acres dam-

age. The 1952 loss now totals 655 fires and 4,462 acres burned, or slightly under the 1951 record low of 669 fires and 4,495 damaged
