Plant 2,000,000 Trout in Michigan Waters

Nearly two million trout have been planted by the conservation department in Michigan this far this year in a program that calls for several hundred thousand more to be planted before 1953.

Most plantings have been of legal-sized fish — 1,047,000 of them — with 927,000 fingerlings holding second place. Only 23,000 sub-legal-sized fish have been planted.

About 870,000 rainbow, 650,000 brown and 430,000 brook comprise statewide plantings to date. Of the total, 1,550,000 were planted in the northern lower peninsula, 230,000 in the upper peninsula, and 155,000 in the southern lower peninsula.

ARTHRITIS?

I have been wonderfully blessed in being restored to active life after being crippled to nearly every joint in my body and with muscular soreness from head to foot. I had Rheumatoid Arthritis and other forms of Rheumatism, hands deformed and my ankles were set.

Limited space prohibits telling you more here but if you will write me I will reply at once and tell you how I received this wonderful relief.

THE MICHIGAN MIRROR

BY GENE ALLEMAN

(Continued from Page Two)

number of votes actually cast decreased by more than 3 million. Only 16 1/2% of the total population elected Harry Truman president.

Whether his election was good or bad depends, of course, on the political affiliation of the assessor. But no patriotic American, Democrat or Republican, will be happy over a decision made by such a minority of his countrymen.

If Michigan voters don't break all records come November, it won't be for a lack of wooing. Campaign plans on both sides of the fence call for the most concerted onslaught on the electorate in history.

Michigan is a key state in both national campaigns and neither the GOP nor the Democrats can count it in the bag. That's why both Ike and Adlai have, and will, make major speeches here.

The Moody-Potter senatorial campaign will be watched closely by the whole nation. That result may play a dominant part in the makeup of the new Congress.

Potter's scorching attacks on Communism may be another indication of just how much the American public is aroused and alarmed by Red infiltration. Many Michigan observers believe Sen. McCarthy's victory in Wisconsin was less an endorsement of his methods than approval of his vigor in fighting domestic Communism.

Potter is playing that theme for all it's worth.

One Congressional election will have more of an effect on Michigan than it customarily does. That's the one in the Eleventh District representing the Straits.

Potter left his Congressional seat to seek a place in the Senate. In the Republican primary, Victor A. Knox of the Soo was defeated. Community singing and get-acquainted games led to the informal meeting between parents and teachers.

Members of the Clarenceville teaching staff were presented with yellow rose corsages and boutonnieres. Coffee and cookies were served from an attractive table centered by fall flowers and candles.

The shutdown of Great Lakes freighter runs during the steel strike should cause no coal shortage in Michigan this winter.

The idled ships were those that hauled ore down from Lake Superior and carried coal back up on their return. Most of their loads are dumped in the Duluth area for trans-shipment westward.

Michigan gets its coal in a very slight deficit resulted from the steel strike... well under 200,000 tons.

Of course, John L. Lewis can change the picture in the flick of one of his king-size eyebrows. A coal strike — possibly to regain personal political power Lewis has lost — would play hot with more than Michigan.

Michigan lost one popular insurance policy against John L. Lewis.

The last working mine in Saginaw County — and in the whole Central Michigan area — closed this summer at St. Charles. Owned cooperatively by the men who worked it, the mine was granted special dispensation by Lewis to stay open during strikes.

Many a Saginaw Valley home stayed warm during mine shutdowns, thanks to the St. Charles mine.

Today not even a tuppence remains to mark the last stronghold of the once-mighty coal mining industry of Lower Michigan.
