

WEST FARMINGTON

By MRS. IRVIN KNAPP
TELEPHONE MAYFAIR 6-3833

Mrs. Edith Sarantos left Wednesday to spend a few days at Grand Rapids with her brother, John Westlake, who is in poor health.

Mrs. James Tolman spent Sunday with her mother, Mrs. William Tamm.

Mrs. Floyd Howard spent Tuesday in Detroit.

Approximately forty people attended the Women's Christian Temperance Union picnic supper

CARD PARTY

The V. F. W., Auxiliary of Farmington will sponsor a card party on Friday, July 17, at the Town Hall. Activities are slated to begin at 8:00 p.m. Officers of the organization announce that refreshments will be served and they invite all card players to come and join the fun.

ROLLING DOWN THE RIVER

By Bob Kettler

Fellow we know dropped in the other day for a bit of this and that, but mostly to talk about how superior his new '53 Studebaker was to anything else on the road. Told us also of his two sons, currently employed at a local drug store. Seems the druggist had a rough time keeping help and the boys were discussing how peeved he would get when told they were leaving for a trip out west.

"Sort of hate to tell him," said the oldest, who worked behind the soda fountain, "he's going to be real mad."

"Yeah," replied the other, the Jack-of-all-trades, "but he'll be madder at me. Soda jerks are a dime a dozen, but a good floor-mopper-upper is hard to find."

Well, that's life and while a good car isn't hard to find these days, you don't always get the best. That is unless you happen to be one of those fortunate persons who now owns one of the finer Studebakers of the '53 season. It just so happens that here is a car that has everything. Power, worlds of it! Stamina, boy it's rugged! Comfort, like sitting in the easy chair at home! Economy, just look at the savings! It's the beauty of the new car fleet, too. Superbly streamlined with a continental design that's out of this world. Why not come in and let us demonstrate one this week end?

A certain lady who is most particular about the upkeep of her car and always brings it in for a periodical check-up and lubrication was telling us of a friend of hers who started suit for divorce. Seems that every time this friend started to win a family argument, the husband shut off his hearing aid.

Now we wouldn't want to make false accusations, but it seems to us that whenever a couple of you, out there, get this far in the column you shut off your own listening apparatus. At least you haven't been in for the regular check-up your car needs and with the weather as warm as it is, that can be dangerous. Your car needs the protection of new greases and oils to stand the heat of the summer ahead with its long week ends. Your car needs the attention of mechanics, too, to insure a perfectly operating motor at all times. Be seeing you soon.

That's that, but—did we ever tell you of the fellow who married a girl with a lot of money? Calls her his checkmate!

Yours,
BOB KETTLER

Baptists To Show Film July 19

On July 19 a special showing of the new Christian film "Miracle" will be presented at the Farmington First Baptist Church at 7:30 p.m. This film story, produced by Universal Films at Bob Jones University and featuring Dr. Bob Jones, Jr., portrays the life of Joe Pavelli, who was beyond human help, and the miracle it took to save him. "Miracle" grippingly reveals the deadly power of sin and the overcoming power of the Gospel of Jesus Christ when it is applied to the human heart. Also featured on the same program will be a full-color 15-minute musical film entitled "Vesper Melodius" produced by Universal Films.

IRONING OF NEW FABRICS MADE EASIER

Ironing day is not what it was before the advent of man-made fibers. It is easier and quicker. Florence Hann, extending clothing specialist at Michigan State College, suggests ironing is easier now because homemakers merely iron to smooth the new man-made fabrics. Although a pressing iron is needed and a slow, deliberate motion with a low-temperature iron. The weight of the iron will smooth out any wrinkles. Acetate always requires ironing but nylon, rayon and rayon must need no ironing. If they do, the new method of slow, easy, cool pressing is all that is needed. Since man-made fibers dry very quickly you may sprinkle garments so they are evenly damp. Or you may prefer to iron the garment before it is completely dry. Ironing on the wrong side protects the surface and keeps the fabric looking new for longer time. But when you want to touch up pockets, collars on the right side, Miss Hann suggests you use a dry press cloth about the weight of muslin. This will prevent any glaze or shine on these new man-made fibers.

Long sleeved blouses of acetate are less worry for the modern homemaker. For the final touch she hangs the blouse on a hanger in the air — and presto! — the steam left in the fabric will take out the wrinkles as the fabric dries.

Sincerely Yours

Letters submitted to the Editor for publication in this column are those of the writer and do not necessarily represent policies of this newspaper.

Dear Sir:

Letters which have run under the caption "Sincerely Yours" have been very interesting to me. I, too, am for a closed hunting season in Farmington Township.

Perhaps this decision may be unfair to the person who is a careful hunter, but unfortunately his number is far less than the careless hunter.

Our property has been posted for years, as has the property of our neighbors, but it has made little difference. Our house as well as our neighbors' has been peppered with shot, our windows broken.

You don't take your life in your hands when you hear shooting and run out and try to stop hunters, add if you call the authorities you can hardly blame them for not running into a heavily wooded area after hunters who pay no attention to signs.

This type of hunter doesn't stop and ask permission to hunt on your property. No, he has a few hours before or after work, and he has no respect for you or what belongs to you.

These are the hunters who have their guns set up in their cars, who slam on the brakes as they are opening a car door, have a gun to their shoulders and ready to shoot immediately.

Do you believe they know if children are somewhere in the area? I don't.

We have been most fortunate there has not been a casualty as

New Dentist Enters Practice In Farmington

Dr. Bernard J. Masson has entered dental practice in Farmington at the offices of Dr. Nyal Carpenter at 34405 Grand River.

Masson lives with his parents in Detroit. He received his Bachelor of Science degree from the University of Detroit in 1948 and his D.D.S. from the same institution in 1953.

For 27 months during World War-II Masson served with the Eighth Air Force in England. He flew 35 missions in England; was a bombardier and navigator.

The young dentist is a member of Delta Sigma Delta national fraternity.

yet. Are we going to stand by and run the chance of such casualties?

I truly believe the greatest offenders are those from outside the township. Their homes or families are not here, why should they concern themselves? The territory is open to hunters. What does a sign mean? Forget it, you can get away before the police come!

As it was pointed out before, those farming can get permits to exterminate offending marauders of the animals and bird world which endanger their crops. This at times no doubt is a necessity.

Isn't it better the farmer take care of his own hunting problems, but have the township as a whole closed to the carelessness of the novice hunter?

I believe so.

Sincerely,
Russell H. Denton
25203 Inkster Road

State Notes New Records In 1952 License Buying

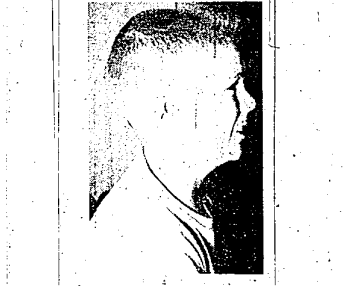

Last year was a big year for hunting and fishing in Michigan. The conservation department's fiscal year-end report shows a number of license buying records were set during the year.

Trout stamp sales, resident and non-resident fish license sales, non-resident small game hunting license sales and resident and non-resident deer license sales to both archers and firearm toters also topped all previous yearly totals on department records.

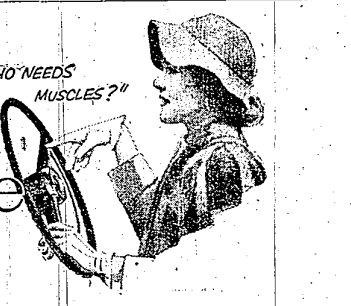

Also, in 1952 resident small game hunters purchased nearly 665,000 licenses, the highest yearly total since 1946 when a record 687,000 small game licenses were sold.

A few sales slipped below previous totals, but none significantly so.

FOR AN EXPERT JOB

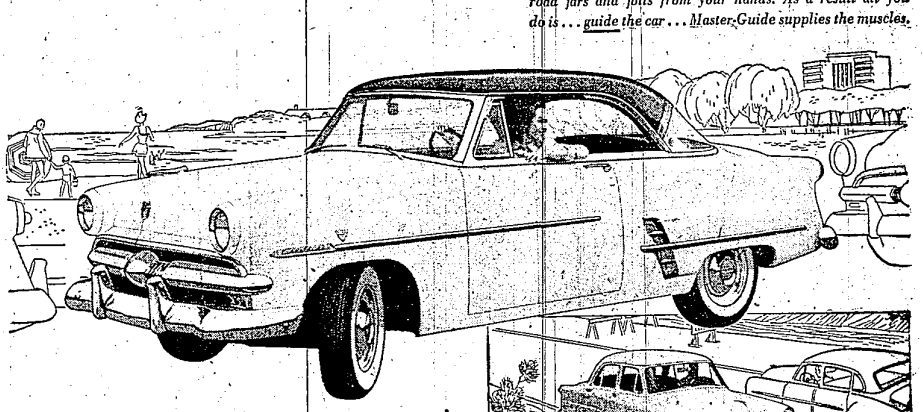

TERRY HERNDON Gets His FLAT TOPS at BOB'S BARBER SHOP

"WHO NEEDS MUSCLES?"

Master-Guide applies hydraulic steering power automatically... and in varying degrees as required... right at the steering linkage, close to the wheels. At the same time the system serves as a hydraulic shock absorber to keep road jabs and jolts from your hands. As a result all you do is... guide the car... Master-Guide supplies the muscles.

NOW! Ford Master-Guide the last word in Power Steering!

It's the newest in a long list of Ford advancements that make this Ford the outstanding car for '53!

No other car near Ford's price has ever offered you so much! Ford was the first in its field to bring you V-8 power. Today, Ford alone of all the low-priced cars offers you the smooth, unsurpassed performance of a V-8 engine. And Ford's Six—the most modern in the industry—with Overdrive, won the Grand Sweepstakes in this year's Mobilgas Economy Run.

Ford first brought to the low-price field a completely automatic transmission that combines the smoothness of a torque converter and the gas-saving "go" of automatic gears. Fordomatic remains the most versatile automatic you can buy.

Ford's new "ride" brings you road-bugging and hump-bumping qualities never before known in low-priced cars. Front end road shock alone has been reduced up to 80%.

Easier-acting suspended pedals. Center-Fill Fueling and Full-Circle Visibility are just a few of the many important advancements first introduced by Ford.

And now Ford brings you the newest and finest in power steering... Master-Guide, a system exclusive in Ford's field! It's no wonder, then, that Ford is the "Worth More" car... worth more when you buy it... worth more when you sell it.

HELPS YOU OUT OF "TIGHT SPOTS!" The tougher the going the more Master-Guide works for you. For example, if you go off the pavement onto a soft shoulder or a rough, rutted road, Master-Guide provides the muscles to keep you on a steady course. At the same time, Master-Guide absorbs the shock that might otherwise be transmitted to the steering wheel. You'll find off-handling is easier with Master-Guide and that parking requires only one-fourth the normal effort. Should Master-Guide ever lose its power, the standard steering mechanism will operate just as usual. Thus, Master-Guide provides new sure and stability, with a natural feel and full security, wherever you may drive. Optional on all V-8 models of extra cost.

Test Drive **Ford** with Master-Guide Power Steering!
