

College Specialist Gives Hints for Knife Care

It is not the work a kitchen knife does that makes its edge grow dull. It is the careless treatment it gets, points out Esther Everett of Michigan State College's home management department.

Placing a knife in a drawer with many other small tools is bad treatment. Store your knives in a simple knife rack with slots for each knife. Or place them against one of the new magnetic knife racks where they cling until you take them off.

Ford's New Ball-Joint Suspension gives you the Newest Ride on the Road!

This revolutionary new Ford front suspension soaks up road shock before it reaches you! Makes all riding and handling easier!

Seals out dirt. You can forget road splash because dirt and water can't get into the ball joints in Ford's new front suspension. Each of the four joints is effectively sealed by a unique rubber-and-metal shield. This means that contact surfaces of each ball and socket remain clean—wear is kept to a minimum.

Keeps that new-car feel. You'll enjoy Ford's new-car feel much longer because ball joints are spring-loaded to compensate automatically for any wear. Front wheels hold alignment far longer than with conventional systems. Ball joints can't stick or bind. Steering remains consistently easy.

THE "OLD" roads won't seem the same with Ford's new Ball-Joint Suspension "paving" the way for you. You'll enjoy a softer, more level ride because Ford's new system allows greater shock absorbing movement of the front wheels. Handling is far better, too, not only on turns but on the straightaways as well. That's because conventional kingpins have been replaced by simple, sealed ball joints that won't stick or bind. No other car in Ford's field can equal this modern ride—because no other has Ball-Joint Suspension.

Agile new performance, too, is yours in a '54 Ford. Whether you choose Ford's new 130-h.p. V-8 or 115-h.p. I-6 block Six you get the quick response and smooth, quiet operation of a modern overhead valve, low-friction deep-block engine. And no matter which of Ford's 28 new models you choose you enjoy recognized style leadership—with clean, modern lines... sparkling new colors... and harmonizing upholstery fabrics and trim.

Eliminates 12 wear-points. Ford's Ball-Joint Front Suspension eliminates 12 of 16 points of wear found in conventional systems. Rubber-bushed supports at inner ends of suspension control arms not only reduce the number of wear points but also insulate chassis from road noises.

We cordially invite you to Test Drive a '54 Ford
