New Dispenser

ARE YOU IN HOT WATER?

A new kitchen convenience, a hot water dispenser that gives homemakers hot water up to 190° F. instantly at the kitchen sink is now available.

The dispenser is ideal for making instant coffee, instant soups, cereals, vegetables, for thawing frozen foods, warming baby bottles, preparing gelatins, gravies, puddings, etc.

Made by the In-Sink-Erator Division, Emerson Electric Co., Racine, Wis., the unit weighs only nine pounds.

A SMALL TANK assembly is affixed to the wall under the sink. Copper tubing leads up to the actual dispenser tap, which is mounted on the sink, much like a sink spray.

A twist of the knob on the chrome tap is all that's needed to produce hot water instantly.

According to In-Sink-Erator officials, the dispenser is like having a hot tea kettle ready to pour at all times. Its kitchen uses are not limited just to food. It can be used to heat tight bottle lids and to defrost the refrigerator, among other things.

FOR SAFETY, water in the tank is not kept under pressure. Turning the tap merely allows water into the tank assembly, which forces the hot water out instantly.

The dispenser comes with a 3-prong plug, already attached ready to plug into an ordinary 120-volt household outlet.

Suggested retail price of the product is \$75.

Tips

- 1. Have your appliance installed by a responsible dealer.
- 2. Be at home when the appliance is installed.
- 3. Read the manufacturer's directions on proper use and maintenance. Also read the warranty to familiarize yourself with the manufacturer's obligations regarding service and repair.
- 4. Before the serviceman leaves, run the appliance yourself. Be sure it performs to your satisfaction and that you know exactly how to operate it.
- 5. If you have any questions and the serviceman cannot answer them, call your dealer.
