Looking Ahead
By DR. GEORGE S. BENSON

(Continued from Page 2A)

Undisputed objective of the Government of the State of California, in its liberal supporting public education of our youth, is to produce loyal citizens, men and women who are informed on the history and achievement of America.

Another portion of the committee's recommendation said: "This committee recommends for a course of study in our California schools, the selection or preparation of a documented analysis of the comparative living standards available to citizens of our country in contrast with the living standards of countries in which totalitarian rules hold sway. We should give a plain, understandable and emphatic testimony to our youth on the merits of American institutions, and it is the proper function of the instructors employed by the State to do that clearly and positively."

Things are getting brighter around the house. Manufacturers now are bringing out mops in lime, lemon and other colors; green, blue and yellow clotheslines; pots and pans in all colors of the rainbow.
