Education Through Fine Art

Art Plays Big Part In Coordinated Fine Arts Program In School System

In the elementary grades of the Farmington Township Schools, the fine arts are taught to enable students to become understanding and well-rounded citizens. Finished artists or musicians are not the ultimate aim of the Elementary Fine Arts program. Good citizens are, however, and to this end the application of the arts to everyday living is exemplified at school.

Basic art work, as such, is an important part of the school's Fine Arts program. The elementary classroom teacher, with the aid of the art consultant, is responsible for seeing that children in the classroom have the opportunity to experiment with various art mediums such as crayons, chalk, charcoal, paint and water-colors in two dimensions. Cut paper, clay and paper mache as well as crafts such as linoleum block printing, basket weaving and textile printing offer experience in three dimensions. This doesn't mean that each teacher must teach each of these during a single year but that the child will, during his or her elementary school years, experience each medium at least one or more times at various levels of accomplishment.

IN DOING these projects in the classroom the teacher is expected to guide and encourage the children but not to force ideas of how it should be done on the child. An effort is made to enable the child's inherent sense of creativity to evolve into the drawing, painting, modeling and projects that he or she works upon. This creativity in the child will provide a basis for a feeling of satisfaction and accomplishment that is important to a person's well-being.

It is the feeling that children's work should be judged and evaluated by children's standards. The child's symbol for a tree may not even approximate that of an adult but if his esthetic senses are satisfied that is sufficient. If he is not satisfied, then the teacher has the opportunity and responsibility to offer her aid but not in any way force her adult interpretations on the child. The teacher rather directs in a way that aids the child to see for himself how the problem can be solved. It is important to the child that his success be encouraged and praised but the teacher must always be careful not to praise indiscriminately, for in so doing, creative thinking is discouraged.

ART IS but one of the Fine Arts. Its application with the other arts to everyday living can have lasting effect upon each citizen. The home can be made much more attractive and livable through the use of color, textures and arrangement. The city, and the beauty of its trees, parks and buildings can be seen and loved for their own sake.

Information presented here will be brought out in the "Education Through Fine Arts" program to be presented by the students of the Farmington Elementary Schools at the high school gymnasium on

Now In Missouri

PFC. GERALD E. WILLIAMS
Pfc. Gerald E. Williams, son of Mr. and Mrs. Carl E. Williams of 23725 Middlebelt, left for Fort Leonard Wood, Missouri, February 17.

Gerald is a member of the National Guards of Detroit. He is in Missouri for special training as a mechanic on big transport trucks. He is expected to be gone about two months.

Huge rocks carved by wind and sea tower into unusual rock formations in the Upper Peninsula. Popularly called "picture rocks," they have become a major tourist attraction.

Lake Huron freighters anchored two miles off-shore from Ahuster, Michigan, take on zyzzum cargoes by a continual overwater conveyor system extending all the way from shore.

Thomas Street Friday evening, April 1.

Next week the third in this series of articles on the Fine Arts program in Farmington elementary schools will be presented. The article will deal with the instrumental music program being conducted in the school system.

Normandy Hills Assn. Holds First Meeting, March 1

The Normandy Hills Association of Normandy Hills Subdivision held its first semi-annual meeting on Tuesday, March 1, in the kindergarten room of the new elementary school on Ten Mile Road near Powers.

Reports of the treasurer, secretary and various committee chairmen were made following an opening address by Walter De Groot, the retiring association president.

New officers elected to the board of directors at the meeting were: Elliot Rogers, president; Stanley Thorpe, vice-president; Roy Otey, treasurer; John Syland, director; and William Cugdill, director.

Members of the board of directors not up for election at this meeting were: Mrs. Jacqueline Davis, secretary; William Habara, director; Raymond Jalbert, director; and Wesley Hanson, director.

Following the election, general discussion was conducted covering community resources, depths of wells in the subdivision, and taxation.

Refreshments of cookies and coffee were served by the social committee.

The meeting was very encouraging to the members of the association because, although only seven families are residents in Normandy Hills at present, 31 members attended the meeting.

The first meeting of the newly elected board of directors will take place Thursday, March 10, at the home of Mr. and Mrs. William Cugdill in Normandy Hills.

MORE PEOPLE BOUGHT FORD CARS IN 1954 than any other make!

Ford passenger-car sales to customers outnumbered those of any other make by thousands*

AND IT'S EASY TO SEE WHY!

Ford is the leader in styling

Motorists know that Ford has set the style trend in the industry for years. And now, with styling inspired by the fabulous Thunderbird, Ford is farther out front than ever!

Ford is the leader in V-8 power

Ford was first in its field (by 23 years) to provide the advantages of V-8 power. Since that time, Ford has built over 14,000,000 V-8 engines—more than all other makers combined! For 1955, Ford offers two new and mighty V-8's, as well as a most modern Six—all with the split-second response of Trigger-Torque power!

Ford is the leader in ride

Ford was first in its field to introduce Ball-Joint Front Suspension—the greatest advance in chassis design in 20 years. And, for '55, it's even better. Springs are set at an angle to smooth out even the tiniest bumps. It's the new Ford Angle-Poised Ride.

FORD IS THE LEADER IN ALL THE FEATURES THAT MAKE YOUR CAR WORTH MORE WHEN YOU BUY IT - WORTH MORE WHEN YOU SELL IT
