

Probation Seminar At Madonna

The Michigan Criminal Justice Educators Association will hold a seminar and workshop on volunteers in probation work Wednesday, June 20. The seminar will be hosted by Madonna College in Livonia from 8:30 a.m. to 4 p.m.

Purpose is to provide students of criminal justice, law enforcement officers, judges, probation officers and other personnel in the Michigan criminal justice system with the opportunity to become acquainted with the concepts and practices of using volunteers (para-professionals) in probation work.

Instructional staff will include Judge Keith Leenhouts, director of Volunteers in Probation, Inc. Dr. Ernest Shelly, director of volunteer services for the Ingham County court system at Lansing; Kenneth Kirkwood and William Stiles, probation directors of the 16th and 17th District Courts, respectively; and Norman Gomolak, assistant professor at Wayne State University.

There will be a nominal charge for the seminar and luncheon.

Those interested in attending should contact Ronald Troyer, Conference Co-Director at Madonna College, 3660 Schoolcraft Rd., Livonia 48150.

PO-BOX Drugs

'Natural' Drugs Still Harmful

Questions should be sent to the Community Commission on Drug Abuse, PO Box Drugs, Livonia, 48151.

A lot of my friends are saying that you are safe if you use natural drugs and stay away from chemicals. They say that they've seen a lot of kids really wreck themselves with chemicals like LSD and heroin and that things like marijuana and mescaline aren't harmful. What do you say?

A. Actually, all drugs are chemicals, but we understand what you are getting at.

The magic word today, and not just in the field of drug abuse, is "natural." As a result, there is a tremendous consumer demand for wines that often, in fact, have never seen a grape, and lemon shampoos and rinses whose only connection with that fruit is the picture and the label in most instances. We could go on.

There is also a mistaken belief that vitamin C is no good unless it comes from rose hips, naturally, of course.

Some naturally occurring drugs, morphine for example, can be addictive. Strychnine, one of the deadly poisons, is derived naturally from plants. So you see the distinction breaks down very readily.

The important thing to remember is that most of the so-called natural drugs on the street (marijuana excluded) are in fact chemicals produced artificially by man such as LSD and PCP.

"People close" to the street drug scene estimate that only about one per cent of the drugs sold as "natural" are actually so.

It doesn't make a lot of difference what you rise your hair with. Just make sure you don't wash your brain out - naturally or otherwise.
