WILL BOARD or care for baby or children in my home. 23259 Moorock. 8 Mile - Middlebelt. 40-11.

### Ordinance C-45-55; Water Supply And Sewage Disposal Revenue Bonds

At a regular meeting of the Council of the City of Farmington, Michigan, held in the city hall in said city on the 5th day of July, 1955, at 8:00 o'clock p.m., Eastern Standard Time.

Present: Hays, Calkins, Chapman, Lindbert.

The City Clerk presented to the Council an affidavit showing that the minutes of the Council meeting held on June 27, 1955, relating to the introduction of Ordinance No. C-45-55 and the placing of the same upon the table, were published in the Farmington Enterprise on June 30, 1955. By unanimous consent, said affidavit was ordered filed with the City Clerk.

It was moved by Chapman and seconded by Hays that Ordinance No. C-45-55 be taken from the table and be placed upon the order of its final passage.

Yeas: Hays, Calkins, Chapman, Lindbert.

Nays: None.

It was moved by Hays and seconded by Chapman that Ordinance No. C-45-55 be adopted.

AN ORDINANCE TO PROVIDE FOR IMPROVING, ENLARGING AND EXTENDING THE WATER SUPPLY AND SEWAGE DISPOSAL SYSTEM OF THE CITY OF FARMINGTON, MICHIGAN; TO PROVIDE FOR THE ISSUANCE AND SALE OF REVENUE BONDS TO DEFRAY THE COST THEREOF; TO PROVIDE FOR THE REGULATION AND SECURITY OF SAID BONDS; AND TO PROVIDE FOR OTHER MATTERS RELATIVE TO SAID SYSTEM AND SAID BONDS.

Section 1. Whenever used in this ordinance or in the bonds to be issued hereunder, except when otherwise indicated by the context, the term "city" shall be construed to mean the City of Farmington.

(b) The term "council" shall be construed to mean the Council of said city, the legislative and governing body thereof.

(c) The term "project" shall be construed to mean the improvements, enlargements and extensions to be acquired pursuant to this ordinance.

(d) The term "acquired" shall be construed to include acquisition by purchase, construction or by any other method.

(e) The term "water supply system" shall be construed to include all plants, works, instrumentalities and properties (as the same shall from time to time exist), used or useful in connection with the obtaining of a water supply for the treatment of water and/or the distribution of water.

(f) The term "sewage disposal system" shall be construed to include all sanitary sewers, combined sanitary and storm sewers, plants, works, instrumentalities and properties (as the same shall from time to time exist), used or useful in connection with the collection, treatment and/or disposal of sewage, by the city.

(g) The term "system" (unless preceded by the words "water supply" or "sewage disposal") shall be deemed to refer to the water supply and sewage disposal system of the city.

(h) The term "revenues" and "net revenues" shall be construed as defined in Section 9 of Act No. 34, Michigan Public Acts of 1932, as now amended.

Section 2. The Council hereby determines to operate its water supply system and its sewage disposal system as a combined system to be known as its "Water Supply and Sewage Disposal System."

Section 3. The Council hereby determines it to be advisable and necessary to improve, enlarge and extend the water supply and sewage disposal system of the city by acquiring the following:

1. Water mains located as follows:
  - (a) From the proposed pump house (located approximately 100 feet west of Farmington Road and 300 feet south of the Grand River Cutoff) north in city property to said Cutoff; thence northwest in the Grand River Cutoff, north in City Road and east in Grand River Avenue to Pickett Avenue - 6,450' of 16" main.
  - (b) In Oakland Avenue from Gill Road to Pickett Avenue - 420' of 8" water main.
  - (c) In Farmington Road from Cloverdale to a point 900' north - 900' of 8" water main.
  - (d) In Shawnee Road from existing pump house to Powers Avenue - 600' of 8" water main.
2. Two water supply wells: one pump house; one combined pump and master electrical control house; one master pump control (Continued on Page 7A)

### CONSERVATION DEPT. RECOMMENDS FEW CHANGES IN SMALL GAME HUNTING LAWS

The Conservation Department has recommended little change in small game hunting regulations for this fall.

Reduced bag limits on ruffed grouse, prairie chickens and sharp-shinned hawk are about the most important changes being considered.

If the Conservation Commission goes along with the Department recommendations, bag limits on grouse will be reduced from five per day, 10 in possession and 25 for the season to three per day, six in possession and 15 for the season.

Regulations on rabbits, hares, muskrats and raccoons would be the same as last year.

Last year's regulations on fox and gray squirrels, skunks, badgers, opossums and mink would also stand for this year.

Beaver Island would be closed to woodchuck hunting, otherwise the season would be the same.

Phasant hunting rules stand substantially unchanged, with the usual season dates and bag limits recommended.

No change in daily hunting hours is recommended.

A small area in northeast Chippewa County would be closed to protect prairie chickens, but apart from that, season dates and other areas would coincide with last year.

The federal government will set out the framework of regulation on ducks, geese and other migratory waterfowl later in July.

Shotgun Shooting Guide Available To Sportsmen

For amateurs or old hands, the publication "Handbook on Shotgun Shooting" is highly recommended by Conservation Department workers.

The 144-page booklet discusses upland game shooting, waterfowl hunting, shooting methods, trap and skeet, and a variety of other subjects.

Sportsmen may obtain the book for the cost of printing - 25¢ - from the Sportsmen's Service Bureau at 2525 East 43rd Street, New York, City.

### SPOT WEAKNESSES IN CIVIL DEFENSE TRANSPORTATION

Michigan's Conservation Department located several important "weaknesses" in the Civilian Defense use of its communication system during the recent "bombing" of Flint and Detroit.

"We found where communications and movement of equipment and supplies could be improved," said M. M. Bergman, chief of state forest fire control and liaison between the Department and Civilian Defense headquarters.

"Naturally," he added, "we'll drop these out before the next test." One problem uncovered was a need for more help at regional and district control centers.

A general discussion of the experiment is planned within a few weeks.

### PROGRESS ON MACKINAC BRIDGE REPORTED GOOD

Prentiss M. Brown, chairman of the Mackinac Bridge Authority, reported today an encouraging progress on the project.

The Department of Economic Development at Cadillac said Mackinac Bridge construction is going along well.

They have established new records for consolidating concrete below water - over 100,000 cubic yards in one month. This is one of the bridge's concrete to be used in the entire construction.

Thirty-four foundations will be completed this year. All but five of them have been started and the Straits already stands out. The foundations were absolutely unshaken by the winter ice, despite the fact that two of them were unfilled. Even empty steel forms were able to withstand the ice pressure.

The most difficult part of the foundation work has been the placement of the concrete. The main tower foundations were anchored to rock more than 200 feet below the surface, and then filled with concrete. The remaining foundation construction is routine operation.

Early in July the main towers will be erected. Once the bases for the towers have been securely anchored in place, the towers should rise at a rate of about 50 feet per week. Consequently, visitors who frequently want to know if anything can be seen above the water will soon be able to see the steel superstructure.

Billboard size signs have been erected on both sides of the Straits for "shoreline superintendents." The signs depict the bridge as it will appear from the observer's point of view. They provide all the factual information about the project as well as indicating where work is going on and what progress is being made.

With over 1,000 employees working directly on the Mackinac bridge project, they are optimistic about the future of the bridge, and opening the bridge before the hunting season in 1957. Brown reports that with continued breaks, especially by way of good weather and no work stoppages, even this target date may be improved.

### STATION TO STUDY PROBLEMS OF WARM WATER FISH, PLANTS

A warm-water fisheries research station will be set up at the present Hastings state fish hatchery in the near future.

Conservation Department director Gerald E. Eddy said the recent legislature made funds available to set up the station for studies of state warm-water fish problems.

At present, the hatchery is used for a variety of fisheries work, but many of its 12 ponds have been unused in recent years.

About \$40,000 will be spent for work at the station during the coming year.

A long list of proposed projects includes tests of competition between game and non-game fisheries, fertilization experiments, vegetation control in relation to fish production and tests of modified fishing regulations.

### COMET WILL BE VISIBLE IN SKY DURING JULY

If you're interested in comets now's the time to bring out the binoculars for a sweep of the north horizon where a bright one is budding, says University of Michigan astronomer Hazel M. Losh.

About two-thirds of the way from the bow of the Big Dipper the bright star Capella in the constellation Auriga is a comet which is rapidly approaching naked-eye visibility, she says.

Comets revolve around the Sun with their tails pointing away from it and the one now visible has a well-defined nucleus with a misty tail more than one degree in length extending perpendicular to the horizon, she describes.

"It's worth while to take a look at it since comets as bright as this one have been rare in the past several years," Professor Losh points out.

Now's a good time to look at the Milky Way too, she adds.

To the unaided eye it's a soft misty light but even binoculars show that it's made up of myriads of faint stars and nebulae, she says.

Another feature of July comes in the fact that the earth will have reached its greatest distance from the sun for the year on July 4. "This doesn't cool things off in the slightest," says Professor Losh, "but just isn't that far away."

### CARD OF THANKS

Many thanks to our friends and neighbors for the many kindnesses shown us during our recent bereavement. We shall be forever grateful to you all.

Bea Burke and Family

### CORRECTION

We wish to express our deep appreciation to our friends and neighbors for the many kindnesses shown us during our recent loss.

Mrs. Albert North and Family

### TWO MILLION STATE FAMILIES PLAN VACATION TRIPS

Nearly 2,000,000 Michigan families will make vacation trips in 1955, Automobile Club of Michigan predicts. More than half of them will spend their entire vacation in resort areas of their home state, Auto Club Travel Services Director Harry N. Rogan says.

Popular objectives for others will be the New England area, Florida, Colorado, Wyoming and western circle tours which take in national parks and monuments en route to the West Coast. Southwestern United States will predominate as a tour area.

More than 20,000 Michigan residents will go abroad this year, with the greatest percentage heading for Europe, Rogan also states. Passport applications from the State already show a 14 per cent gain over a similar period last year. Out-of-staters and foreign visitors will swell the number of travelers in and through Michigan this year to 9,000,000. Tourist revenue for the State will approach \$600 million.

### Report On Channel Work Improvements In State

Channel improvement work has started on a 22-mile stretch of the Huron River in Washtenaw and Wayne Counties and on the Pine Creek watershed in Dickinson County.

Also, the Conservation Department reports that work on the Cedar River watershed in Champaign and Gladwin Counties will be continued this summer.

Channel work on the Fox River in Schoolcraft County, which started five years ago, was recently completed.

Also in the last year, 1167 brush shelters were placed in swales throughout the state and 5000 peat bags were placed in Fish Lake of Barry County and 5000 in Devoe Lake of Ogemaw County. Both Fish and Devoe are marked bottom lakes that support little fish life. The peat bags were planted experimentally to see if aquatic vegetation can be produced to support more fish.

Carrots must be good for vision, did you ever see a rabbit wearing glasses?

John Clappiss a Sells Insurance

### CLAYBANKS ISSUE BRINGS OPPOSITION ON WATER TRAFFIC

The Conservation Department has gone on record as officially opposing a planned U. S. Army restriction on water traffic in a section of Lake Michigan between Ludington and Muskegon.

Camp Claybanks' Army gunners have practice fired over the water area for two years, but complain that small boats often enter the danger zone and disrupt firing.

The Army recently requested permission to pour the entire area, which extends about 20 miles deep and ten mile wide in the lake.

Three previous requests for similar restricted areas on the Great Lakes, have been turned down. Two came in 1948 when the Army wanted range areas restricted in Lake Huron off the Oscoda Air base and near the entrance of Saginaw Bay. The third request was made in 1952, when a large restricted zone was asked in Anchor Bay at Lake St. Clair.

Public hearings on all three produced vigorous public protests, after which the Army dropped the range plans.

### Society Protects And Assists Needy Travelers

The Travelers Aid Society of Detroit, a Torch Drive Agency, helped eight Farmington people solve problems, growing out of travel experiences last year.

The T. A. S., one of 110 members of the National Travelers Aid Association, gives thorough and organized service to travelers and transients in need of assistance of any kind. Most of this service consists of case work by trained social workers. The Society also provides information, direction and travel service for the protection of the inexperienced or the handicapped.

Practical assistance is given to children traveling alone, the handicapped, the aged, the physically or mentally ill, transients, migrants, newcomers, those unfamiliar with local resources, people without funds, and new arrivals in this country.

The Society maintains branch offices in the New York Central Station, the Union Depot and the Greyhound Bus Terminal in downtown Detroit.

Most of us can make ends meet, what we're trying to do is get them to overlap a little.

### State To Purchase Four New Public Fishing Sites

Four new public fishing sites will be purchased in the near future, raising to about 520 the number of water areas in Michigan available to any angler that cares to use them.

The 630 sites are scattered on streams and lakes throughout the state to give fishermen their choice of a variety of water.

The four new sites, recently authorized by the Conservation Commission, are on Duncan Lake in Barry County, Little Round Lake in Alger County and on Emerald Lake and Lake Twenty-Seven in Otsego County.
